Chapter 6

Letters

Introduction to Accounts Receivable Letters

The Letters options provides you with the facility to create, maintain and store a variety of different letters to send to customers. There are two types of letter that you can create:

Dunning (Chase) Letter

Use these to inform customers with overdue debts of the status of their accounts, the amount overdue and the action requested. Text customised for a particular size of debt can be assigned to a particular customer, a range of customers, or all customers.

For a customer to receive a Dunning letter, you must go to the AR maintenance option Names and Addresses and enter a value in the letter category field.

Note: If a customer has a default letter code set up, the type of letter indicated by the code is selected for that customer - in preference to any other code specified in the letter run.

Standard Letter

Use these to inform customers about matters other than credit control, for example product promotion or price list changes.

Facilities Offered

You can personalise letters using the contact name and form of greeting (salutation) contained in the customer details. Alternatively, you can produce generalised letters by entering a salutation that was specified when the letter was created.

You can set letters up in a number of languages, and a language code in the AR maintenance option Names and Addresses. This ensures that the customer receives the letter in the right language.

Enquiry facilities enable you to examine customers eligible for chase letters, using the following search criteria:

- Default letter code
- Credit responsibility
- Letter category

You can use any combination of these criteria to perform an enquiry. You can also enquire by customer to review letters that have been sent, items recorded since a Dunning letter was sent, or cash received since a Dunning letter was sent. Select the Accounts Receivable Letters options.

Select Customers for Dunning (Chase) Letters

1/ARL

The selection of letters to send to customers using this option is determined by a setting in the company profile, as explained below:

Automatic Letter Selection

Set the Generate Chase Letter Refs field to 1 in the company profile. Accounts Receivable will send Dunning letters to the customer in ascending numerical order (01 first, then 02 if the debt remains outstanding, then 03 and so on). This process is automatic, and the letters involved must be given sequential, numeric codes.

- The only criterion entered by you to select a customer for a Dunning letter is the minimum amount owing. However letters will not be sent to customers with a letter category of blank on the names and address maintenance screen.

Manual Letter Selection

If you set the Generate Chase Letter Refs field to 0 in the company profile, then you must specify the code of the letter to be sent to the customer yourself. Here, the criteria for selecting a customer to receive a letter are more complex. You must enter:

- The minimum value the customer must owe on a due date to be selected for a letter.
- The average number of days by which the debt must be overdue on the due date in order to be selected for a letter.
- The letter reference code to indicate the letter that is to be sent.

The following example may make this clearer:

A customer has owed \$70 for 10 days and \$15 for 30 days. The total value owed is therefore \$85. The total number of unit currency days (i.e. the number of days on which a given unit of currency has been overdue) is $(70 \times 10) + (15 \times 30) = 1150$.

Each of the \$85 now due has been owed for an average of $1150 / 85$ days, which is approximately 13.5 days.

The customer would therefore be sent a letter if the selection criteria specified a minimum balance of \$80 and 12 overdue days, but not if they specified \$90 and 13 overdue days.

Although there is considerable flexibility embodied in these selection parameters, you may find it simpler to vary just one parameter at a time, for example:

Minimum Balance	Overdue Days	Letter
0.01	30	01
0.01	60	02
0.01	90	03

Letters 01, 02 and 03 will be sent to customers who have owed anything at all for 30, 60 and 90 days respectively.

Alternatively:

Minimum Balance	Overdue Days	Letter
10.00	30	01
100.00	60	02
1000.00	90	03

Letters 01, 02 and 03 will be sent to customers owing \$10 - \$99.99, \$100 - \$999.99, and over \$999.99 respectively, regardless of the age of the debt.

Letter Print Selection Screen Select Customers

Select the AR letters option Select Customers.

If the Generate Dunning Ltr Ref field in the company profile is set to 0, the selection screen displays.

SL448	El - Demonstration Company	User ED3	7/04/94 9:54:12

Letter categories (up to 9)			(Blank=All categorised customers)
Print immediately or review results? . . .		R	(I=Immediate, R=Review)
F3=Exit F4=Prompt			

Fields:

Minimum Amount

Enter the minimum amount in base currency that a customer must owe on the due date entered in order to be eligible for this Dunning letter. To receive this letter the amount owed must also have been overdue on average for at least the number of overdue days entered.

Example:

A customer has owed \$70 for 10 days and \$15 for 30 days. The total amount owed is therefore \$85. The total number of unit currency days (i.e. the number of days on which a given unit of currency has been overdue) is $(70 \times 10) + (15 \times 30) = 1150$. Each of the \$85 now due has been on average owed for $1150 / 85$ days, that is about thirteen and a half days.

Thus the customer would merit a Dunning letter if the selection criteria were for a minimum balance of \$80 and 12 overdue days, but not if the selection criteria were \$90 and 13 overdue days, or \$80 and 15 overdue days.

Note that where you enter a number of different selection criteria, they should get progressively more severe. Either or both of the minimum balance owed & the overdue days on each line should exceed the corresponding value on the

preceding lines. They may be the same but in no instance should they be smaller.

Overdue Days

Enter the average number of days for which each unit of currency overdue on the due date must have been owed by a customer in order to be eligible for this Dunning letter.

The outstanding balance on this date must also exceed the minimum balance entered.

Letter Code

Enter the reference for the Dunning letter that a customer should receive if he meets both of the selection criteria (minimum balance & overdue days) defined on this line, without being sufficiently overdue to merit any more severe letter defined on a subsequent line.

However, if a customer meets the criteria for any letter defined within this letter run but has also had an override letter entered against him at the customer maintenance screen, the latter is the one that will be sent.

Default Letter Code

The letter entered here will be sent to every customer owing anything at all on the date entered who is not sufficiently in debt to merit a more severe letter as specified above but who has not had an override letter entered against him from the customer maintenance screen.

If a default letter is not specified, one defined by the above selection parameters must be.

Payment Due Date Cut-Off

Transactions overdue on this date (omitting disputed invoices and/or credit transactions if so requested) are taken into account in calculating the outstanding balance and overdue days.

Any later transactions are disregarded in the selection of letters, although the current account balance which includes them is printed on the Dunning letter alongside the balance on this date.

Include Disputed Invoices

1 - To include invoices under dispute in the calculation of which customers are overdue.

0 - If you wish to disregard them.

Include Credit Transactions

1 - To include credit transactions in the calculation of customers overdue.

0 - If you wish to disregard them.

Credit transactions include credit notes and cash receipts not allocated to specific invoices.

Run Description

Accept the suggested description of this letter run or type in one of your own.

The description may be used to identify reports printed as a result of this letter run. If you choose to review the letters to be sent rather than printing them immediately, it is especially useful in helping you to pick out this letter run from any others.

Salutation

You may enter a salutation for this letter run, the salutation being the opening of the letter, e.g. 'Dear Sir or Madam'.

Salutations may also be entered against an individual customer from the customer maintenance screen and against particular letters.

The rules as to which salutation is used on a particular letter are:-

1 - If in defining this letter run, you state that you wish to override any other salutation, then this salutation is used for every letter regardless of what has been defined as the salutation for a particular customer or letter. This applies even if the letter run salutation has been left blank and so is a means of omitting a salutation.

2 - Otherwise, any salutation entered against the customer is used. If there is none, any salutation here entered against the letter is used. If there is none, the letter run salutation is used. If there is none, the letter is printed without any salutation.

Please be wary of entering a salutation here when sending letters in different languages, as results can be unpredictable.

Default / Override

0 - Any salutation defined against the customer will be used.

If there is none, any salutation defined against the letter in question is used.

If there is none, the letter run salutation is used.

If there is none, the letter is printed without any salutation.

1 - To use the salutation entered here to be used in preference to any other.

Be careful of using this override for different languages, as results can be unpredictable.

Single Letter Per Currency

0 - Send a single letter showing the balances in each currency. A letter will not be sent for any credit balances.

1 - Send a separate Dunning letter for each currency in which the customer owes money.

Range Of Customers - From Account

Enter the first customer to be considered for inclusion in this letter run. If this field is blank, all customers up to & including the to account entered will be considered.

You may opt to be prompted on a customer code by entering ?.

Range Of Customers - To Account

Enter the last customer to be considered for inclusion in this letter run. If this field is blank, all customers starting from the from account entered will be considered.

You may opt to be prompted on a customer code by entering ?.

Credit Responsibility

If you wish the letter run to be restricted to the customers assigned to a single credit controller, enter that credit controller's code here. Otherwise, leave this field blank to cover all credit controllers.

Letter Categories

At the customer maintenance screen, you may assign each customer to a category defined by a single letter or number. Enter the codes for up to nine letter categories to narrow down which customers are considered for inclusion in this letter run, or leave blank to look at customers in any category.

Note: NB - if a customer has not been assigned to any letter category, he will receive no Dunning letters even if he owes millions.

Print Immediately Or Review?

I - Enter I for 'immediate' and a batch job will be submitted to print any Dunning letters required and a telephone Dunning list.

R - Enter R for 'review' and the batch job will create a list of recommendations for Dunning letters which you may edit to exclude particular customers or change the letter to be sent to a particular customer using the review/print letters option.

The following example describes what happens where a customer has a mixture of credit and debit balances.

The customer owes £1000 and \$350, but has paid 50 deutschmarks. Overall he owes enough to be eligible for the stronger letter 03. If you specify a single letter per currency, he will receive two 03 letters detailing the dollar and sterling balances, but it would not be sensible to send a letter chasing payment for the negative deutschmark balance. If you do not specify a single letter per currency, he will receive one 03 letter listing all three currency balances.

Although the \$350 balance in itself might only merit a milder 01 letter, it is the overall balance in the company's base currency which determines which letter is used for all currencies. This means that where a customer receives a single letter per currency, all letters are of the same type.

When you have completed the fields, press **Enter** then **F8** to confirm.

If the Generate Dunning Ltr Ref field in the company profile is set to 1, the screen differs slightly.

Letter Print Selection Screen General Dunning Ltr Ref

SL448	E1 - Demonstration Company	User ED3	7/04/94 9:34:06
-------	----------------------------	----------	--------------------

Letter Print Selection

	Pounds

F3=Exit F4=Prompt

In this case, you simply enter a minimum value for the selection of customers. The application will automatically send Dunning letters in ascending order of severity.

Review / Print Suggested Dunning (Chase) Letters

2/ARL

If you generated a letter run for review, the system provides you with a facility to examine and / or modify the list of customers selected and to print the letters to be sent to the selected customer. You are also provided with an audit report feature which details any amendments and the actual letters printed.

Select the AR letters option *Review / Print* to see a list of all the letter runs generated.

Dunning Letter Run Maintenance Screen

This screen shows all the runs available for review, and the following functions are also available:

SL443	EI - Demonstration Company	User ED3	7/04/94 12:13:07
Dunning Letter Run Maintenance			
Date	Credit resp.	User ID	Run Description
5/04/94	*ALL	GBJBAESW	Letter run initiated by GBJBAESW on 050494
2 31/03/94	*ALL	GBJBANRB	Letter run initiated by GBJBANRB on 310394
1=Print letters 2=Edit records 4=Delete run			
5=Display selection details 6=Print telephone Dunn. list			
F3=Exit			

Fields:

Select

1 - To print out the letters in this run. Each letter includes the address and salutation from the main customer file, the default letter headings and balances and value overdue as at the cut-off date.

Details of overdue items are printed if this is specified on the company profile.

The job also produces a report showing any letters suggested but not sent, as well as all letters sent.

2 - To edit the letters before they are sent. This option is explored further below.

4 - To delete the suggested letters, thus cancelling the letter run.

5 - To review the selection criteria made to produce the letter run.

6 - To submit a batch job which will print a list of customer accounts and names, with their telephone numbers and fax numbers and the amount overdue.

Select option 2 to review or amend prior to the letter run.

Dunning Letter Run Maintenance Review / Amend Screen

Enter here the code of the letter you wish the customer to receive. Blank the field out if you do not want to send a letter to this customer.

Functions:

F8

Update the suggested letters run. You can then use option 1 above to reprint the letters for further review, if necessary.

Maintain Chase And Standard Letters

Two AR maintenance options are available:

- Maintain Chase Letters
- Maintain Standard letters

Maintain Dunning (Chase) Letters

3/ARL

This option enables you to set up Dunning letters, which is of course the first step in using the Dunning letters facility.

The format and autosequencing of letter references is controlled by the Generate Letter references and print items on letters specified on the company profile. If you specify on the Company profile to generate ledger references, then the software will send the customer the first letter in the sequence and with each letter run automatically increment the severity of the letter until a payment is received. As such the most polite letter should be letter 1 and each letter should then increase in severity.

Select the AR chase letters option *Maintain*.

Maintain Dunning Ltrs Screen

At this screen edit, copy, delete, change the letter header or print sample of existing letters.

SL446	E1 - Demonstration Company	User ED3	5/04/94 17:10:25

-	04		Collection Document Chase Letter

2=Edit 3=Copy 4=Delete 5=Change header details 9=Print sample
F3=Exit F10=Create new letter

Fields:

Option

Valid options are:-

- 2 - To edit the text of a letter.
- 3 - To copy a letter.
- 4 - To delete a letter.
- 5 - To change the letter header.
- 9 - To print a sample letter.

This screen is the entry screen to all the functions listed above, which will be examined in turn.

Functions:

F10

Press **F10** to create a new letter. This is essentially the same function as option 2 on the same screen, which enables you to maintain an existing letter

Maintain Dunning Ltrs (F10)

Create a new letter.

SL446	E1 - Demonstration Company	User ED3	5/04/94 17:10:48
-------	----------------------------	----------	---------------------

Maintain Dunning Ltrs

Ref. Lang. Description

New letter . : 10 Test Dunning 10

The letter heading follows the general pattern:-

Re - Our Reference	AAAAAAA
Account Balance	999999999999.99
Amount due at 99/99/99	999999999999.99

Dear Sir or Madam

Enter the specific wording that you want:-

for 'Re - Our Reference' .	Re - Our Reference
for 'Account Balance' . .	Account Balance
for 'Amount due at' . . .	Amount due at
for 'Dear Sir or Madam' .	Dear Sir or Madam

F12=Previous

Fields:

New Letter Ref.

Enter the reference by which the new letter will be known. The combination of reference & language should be unique.

This must be a numeric value if the company profile is set to generate letter references.

New Letter Lang.

Enter the language code for the letter.

The combination of reference & language should be unique.

When a customer has been selected to receive a particular letter, it will be printed in the language (if any) held on that customer's profile so long as the letter has been set up in that language.

If the letter has not been set up in that language or the customer has not been defined as speaking a different language to that of the company, it will be printed in the form defined for a blank language code. If the letter has not been defined for a blank language code, the letter cannot be printed (although a report will detail the failure). Therefore it is wise to define each letter for a blank letter code and regard this as representing the native language for the company.

New Letter Description

Enter a brief description of the letter.

Letter Heading - Re - Our Reference

Please enter the wording that you wish to precede the reference at the top of the letter.

This should be in the same language as the rest of the letter.

Letter Heading - Account Balance

Please enter the wording that you wish to precede the current balance on the account at the top of the letter.

This should be in the same language as the rest of the letter.

Letter Heading - Amount Due At...

Please enter the wording for the top of the letter that you wish to precede the date & the outstanding balance on the account on that date.

This should be in the same language as the rest of the letter.

Letter Heading - Dear Sir Or Madam

You may enter a salutation for the letter - this is optional.

You may also enter a salutation against an individual customer from the customer maintenance screen and against an entire letter run.

The rules as to which salutation is used on a particular letter are:

- If in defining a letter run, you state that you wish to override any other salutation, then the salutation entered against the letter run is used for every letter, regardless of what you enter here or against the customer.
- Otherwise, any salutation entered against the customer is used. If there is none, any salutation here entered against the letter is used. If there is none, the letter run salutation is used. If there is none, the letter is printed without any salutation.

Any salutation should be in the same language as the rest of the letter.

When you have completed all the necessary fields press **Enter**. The screen displayed next depends on a setting on the company profile. If overdue items are *not* required to be printed in detail on the Dunning letter, the system will display the letter text screen straight away (see the letter maintenance screen).

Maintain Dunning Ltrs Screen Profile Details

If the profile requires overdue items to be printed in detail, the Profile Details screen displays.

for 'Dear Sir or Madam' . :	Dear Sir or Madam

F12=Previous

Press **Enter**, and the new letter created will be a duplicate of the original. It may then be amended as required.

Deleting a Letter

Instead of taking **F10** to create a new letter as shown in an earlier section, you can enter 4 against an existing letter to delete it, then press **F11** to confirm deletion.

Maintain Standard Letters

12/ARL

This facility enables you to set up standard letters to be saved on file.

Select the AR standard letters option *Maintain* to see a list of standard letters.

Enter 1 to print the letter, 2 to edit the letter, 4 to delete the run, 5 to display selection details and 6 to print the telephone Dunning list.

As edit and maintenance options are alike, let us assume you wish to set up a new letter by pressing **F10**.

The rules as to which salutation is used on a particular letter are:

If when defining a letter run, you state that you wish to override any other salutation, then the salutation entered against the letter run is used for every letter, regardless of what you enter here or against the customer.

Otherwise, any salutation entered against the customer is used. If there is none, any salutation here entered against the letter is used. If there is none, the letter run salutation is used. If there is none, the letter is printed without any salutation.

(Naturally if entered, the salutation should be in the same language as the rest of the letter if it is not to look odd.)

When you have completed the fields press **Enter** to see the text entry screen.

Maintain Standard Letters Letter Text Maintenance Screen

Fields:

Text

Type in the body of the letter's text.

You may scroll to add more text. Note that, when you do roll up, the last line of the preceding page is displayed at the top of the current one to remind you of what you've just typed.

Position To

Enter a line number from which to display the text.

Insert

Enter the number of blank lines to be inserted in the text.

Use the next field to specify the line number at which to insert these lines.

Insert After Line

Blank lines will be entered immediately after this line number.

Specify how many blank lines in the preceding field.

Delete

Enter the number of lines to be deleted.

Use the next field to specify the first line to be deleted.

Delete From Line

Enter the first line number to be deleted.

Specify how many lines to delete in the preceding field.

When you have entered the text, press **F8** to update and save the letter as displayed.

Print Standard Letters

11/ARL

The standard letters options are provided to enable you to produce letters about subjects other than credit control - for example, product promotions, change of address, or price changes.

This option enables you to select the specific group of customers to whom a standard letter is to be sent.

Select the AR standard letters option *Print*.

0 - Any salutation defined against the customer will be used. If there is none, any salutation defined against the letter in question is used. If there is none, the letter run salutation is used. If there is none, the letter is printed without any salutation.

Note: Be wary of specifying that a letter run salutation is to override other salutations when sending letters in different languages, because you're in danger of ending up with letters which have a salutation in a language other than that of the body of the text.

1 - If you wish the salutation here entered to be used in preference to any held against a particular customer or letter.

Customer Range

Enter the last customer to be considered for inclusion in this letter run. If this field is blank, all customers starting from the from account entered will be considered.

Customer Groups

To send letters to customers in a single customer group, enter that group here.

Otherwise, leave this field blank and customers in any customer group will be considered for inclusion in this letter run.

Sales Region

To send letters to customers in a single region, enter that region here.

Otherwise, leave this field blank and customers in any region will be considered for inclusion in this letter run.

Salesman

To send letters to customers assigned to a single salesman, enter that salesman here.

Otherwise, leave this field blank and customers of any salesman will be considered for inclusion in this letter run.

Credit Responsibility

To send letters to customers assigned to a single credit controller, enter that controller here.

Otherwise, leave this field blank and customers of any credit controller will be considered for inclusion in this letter run.

Complete your selection and press **Enter**. The **F8** function key will appear at the bottom of the screen. If you are happy with your selection, press **F8** and the letters will be printed.

Letters Sent Enquiry

31/ARL

This option displays details of all the letters sent to a specific customer.

Select the AR letters enquiry option *Letters Sent*.

Enquiry on Who was Sent Which Letter and When Screen

Fields:

Customer

Enter the code of the customer whose letter history you wish to see.

Letter Type

Enter CL or AR to view all Dunning letters or standard letters respectively for the customer in question.

When you have entered the customer and letter type, press **Enter** to see the list of letters.

Default Chase Letter By Customer Enquiry

32/ARL

This option provides a general enquiry into those customers flagged on the customer maintenance as eligible to receive Dunning letters. It displays the customer's status with regard to sending letters (whether letters should be stopped), shows any override letter, and lists the letter category and language for each account.

Select the AR letters option Default Chase Letter by Customer.

Fields:

Dunning Letter Code

If you wish to see which customers are to receive a specific override letter, enter that letter code. Otherwise, all customers eligible for a Dunning letter (i.e. all customers assigned to a letter category) will be displayed whether or not they are also due to receive an override letter.

Credit Responsibility

If you wish to see the Dunning letter customers assigned to a single credit controller, enter that credit controller's code here. Otherwise, leave this field blank to cover all credit controllers.

Letter Category

At the customer maintenance screen, you may assign each customer to a category defined by a single letter or number.

Enter the codes for up to nine letter categories to be displayed as eligible for Dunning letters, or leave blank to look at customers in any category.

A customer without a letter category will receive no Dunning letters.

When you have entered your selections, press **Enter** to display the main enquiry screen.

Dunning Letter Customers Enquiry Screen

At the top of the screen your selection of letter type, responsibility and letter categories from the previous screen is displayed as a reminder.

*1=Letter cannot be sent - it does not exist at all.
*2=Letter cannot be sent - exists in neither the customer's nor default langs.
*3=Letter can be sent but in default language, not customer's.
F3=Exit F12=Previous

Fields:

Ltr

Displays the letter code selected at the previous screen, or, displays blank - If all letter codes were selected.

**3

An explanation of the letter status is given at the bottom of the screen.

Category

Displays the letter category entered for the customer at the Name and Address Maintenance option on the Additional Details screen.

Resp.

Displays the initials of the credit controller which you defined as responsible for the customer account.

Lang

The letter will be produced in the language of the displayed language code.

Verify Language Chase Letters

33/ARL

This enquiry is a useful check on 'missing' letters. When you enter the option you are presented with a list of all the letters which have been specified as a customer's letter but which have not been defined to the system.

If, for example, you set up letter 01 in English as a Dunning letter for a British customer, and then specified that letter 01 in French should be sent to a French customer as the default letter, this list would tell you if the French version had not been set up.

Three options are then available to you:

- You can create the 'missing' letter.
- You can base the 'missing' letter on an existing letter.
- You can enquire on which customers have the 'missing' letter specified against them.

Select the AR letters option *Verify Language Chase Letters* to see a list of languages specified to customers but not yet defined on the system.

Verify Language Dunning Letters Screen

SL450	E1 - Demonstration Company	User ED3	7/04/94 12:43:15
Verify Language Dunning Letters			
Opt.	Ltr.	Lang.	Opt.
1	01	UK	
-	01	US	
1=Add letter 3=Copy letter 5=View customers			
F3=Exit F5=Refresh			

Fields:

Option

- 1 - Set up the letter from scratch.
- 2 - Base the new letter on an existing one.
- 5 - List all customers who are meant to received the 'missing' letter.

If you want to create the letter, enter 1 against it.
The screen then displayed is the one used for
creating a letter when you select the dunning
letters option *Maintain*.

Verify Language Dunning Letters Maintenance Screen

It is shown below, but for details of how to complete it refer to Dunning (Chase) Letter.

SL450	E1 - Demonstration Company	User ED3	7/04/94 12:43:26
-------	----------------------------	----------	---------------------

Verify Language Dunning Letters

	Ref.	Lang.	Description
New letter . :	01	UK	

The letter heading follows the general pattern:-

Re - Our Reference	AAAAAAA
Account Balance	999999999999.99
Amount due at 99/99/99	999999999999.99
Dear Sir or Madam	

Enter the specific wording that you want:-

for 'Re - Our Reference' :	Re - Our Reference
for 'Account Balance' . . :	Account Balance
for 'Amount due at' . . . :	Amount due at
for 'Dear Sir or Madam' . :	Dear Sir or Madam

F3=Exit F12=Previous

If you wish to create the letter by basing it on an existing letter, then enter 3 against it.
