Chapter 10

Historical Data Options

Introduction to Accounts Receivable Historical Options

To access the Historical Data facilities, select the AR Historical Data options.

The Accounts Receivable application provides facilities to archive data no longer needed for operational use. This involves saving the data so that it can be stored off the machine, releasing space for new data. See the Delete redundant data option.

Data saved in this way is called historical data, and each time data is archived a single new library is created to hold the historical data.

Check that the archived data you wish to review has been restored to your computer.

Items Enquiry

1/ARH

This procedure enables you to display specific information about specific transactions, once they have been restored to your computer.

Select the AR utility enquiry option *Items*. When you have selected the archive library which interests you from the list displayed, the enquiry screen displays.

Enquiry on Archived Items Screen

For any parameter, leave both from & to fields empty to accept ALL values for that parameter. To accept every value FROM or TO some limit, enter that limit in the from or to field respectively and leave the other field blank.			
F3=Exit F12=Previous			

Fields:

Item Type

Enter the range of item types which are to be included within the enquiry. If all item types archived are to be viewed, these entries should be left blank. You can include any of the following item types.

IN - Invoice

CR - Credit Note

JL - Nominal Journal

JT - Journal Transfer

FJ - Prime Currency Journal

AL - Allocation

Order

Use this column to specify the sequence in which the selected details are to be presented. 1 is the major sequence, 5 the minor sequence.

Ascending / Descending

Use this column to specify the sequence in which selected details are to be displayed.

Item Reference

Enter a specific range of references which are required. If all references archived are to be displayed, leave these fields blank.

Customer

If details specific to a single customer or range of customers are required, enter the 'From' and 'To' accounts. For all customers, leave these entries blank.

Document Date

To examine items posted within particular dates or periods, enter the limits required. Leave these entries blank to exclude date selection.

Posting Period

To examine items posted within particular dates or periods, enter the limits required. Leave these entries blank to exclude date selection.

Session

To examine transactions posted within particular sessions, enter the session range. Leave these fields blank to include all sessions.

Value Excl. VAT

Items may be selected according to the transaction value exclusive of VAT. To report regardless of transaction value, leave these entries blank.

Value Incl. VAT

Items may be selected according to the transaction value inclusive of VAT. To report regardless of transaction value, leave these entries blank.

When you have completed these fields, press **Enter**. The items matching the search criteria are then displayed, and can be selected for a detailed enquiry.

Names and Addresses Enquiry

2/ARH

This option enables you to display archived customer details.

Select the AR utility enquiry option Names and Addresses. When you have selected the archive library which interests you from the list displayed, the enquiry screen displays.
