Chapter 3

Enquiries

Introduction To World Trade Enquiries

The enquiries in World Trade can be grouped into two key areas:

Reference Details

These are the same formats as the maintenance procedures. You can make these available to users who do not have authority to use maintenance. These enquiries are:

- Country
- Stockroom
- Customer trade and delivery details
- Supplier trade details
- Item
- Charge/VAT codes in different countries.

Order Override Status

These use the same format as the override screens. Users without the authority to override an order, can check on the order's status. These enquiries are:

- Purchase Order Overrides
- Sales Order Overrides.

These enquiries also access the order enquiries in the relevant application - Order Summary from Purchase Management, and Whole Order Enquiry from Sales Order Processing. Therefore you can monitor the status of the order without needing authority to the initiating applications.

Country Enquiry

1... 1/WTE
2...

Use the Country Code Enquiry to view the following details:

- Information about this company in the country.
- General information about a country.
- Intrastat Mask.
- Redefinition of country codes for Intrastat and ESL reporting.

Country Code Enquiry Selection Screen

To display this screen, select Country (Master File Enquiries).

Use this screen to select which country you want to display.
