Chapter 4

Reports

Range Of Reports

World Trade has a full range of status and management reports. The status reports list data from the reference files. Status reports cover the following reference files:

- Items.
- Customers.
- Suppliers.
- World Trade Movements:
 - EC Movements listing
 - Temporary Movements Register.

The management reports are designed to provide details on the VAT position of the company, the VAT return of the company (multi- currency if required) and on the relation between export invoices and applications. These reports are:

- Invoice Number Audit.
- Tax Postings Reconciliation.
- VAT Postings Reconciliation.
- Currency VAT Report.

Movements Listing

1... **2...** 1/WTR

This report lists all the intra EC movements of goods recorded in World Trade. It is not a statutory report. The report details the aspects of an EC movement that you can maintain within World Trade.

The report attributes are:

- Frequency - As required.
- Stationery - Standard listing paper.
- Print Positions - 132.
- New Page - Page overflow.
- Totals - None.
- Sequence - To country.

Movement Reporting Screen

To display this screen, select Movements.

Use this screen to define movements listed in the report.

WT820	Z1 - Demonstration Company	USER SP1	23/09/94 11:27:02
Movement Reporting			
From country?.. ____			
To country?.. ____			
Source ____			
	From	To	
Movement date	21/08/94	21/09/94	
Invoice date	0/00/00	0/00/00	
Tax point date	0/00/00	0/00/00	
F3=Exit F4=Prompt F8=Submit			

Fields:

From Country

Enter a country to restrict the report to movements from that country.

To Country

Enter a country to restrict the report to movements to that country.

Source

Enter a source to restrict the report to movements generated within a particular application. The option are:

J - Service Management

M - Manual movement entered in World Trade

P - Purchase Management

S - Sales Order Processing

T - Distribution Orders from DRP or World Trade

Movement Date Range

Enter the range of movement dates to include.

Invoice Date Range

Enter the range of invoice dates to include.

Tax Point Date Range

Enter the range of tax point dates to include.

Note: Enter all dates in the format DD/MM/YY.

Tip: Leave all these fields blank to generate a report listing all movements maintained within World Trade.

Select **F8=Submit** to submit the report.

Invoice Audit Report

2/WTR

This report lists all the Sales Order Processing invoice numbers consolidated into a single World Trade invoice number. Consolidation can occur when printing export invoices within World Trade SPEX.

The report attributes are:

- Frequency - As required.
- Stationery - Standard listing paper.
- Print Positions - 132.
- New Page - Page overflow.
- Totals - None.
- Sequence - World Trade invoice number.

Invoice Number Selection Screen

To display this screen, select Invoice Audit.

Use this screen to define the invoices to include in the report.

WT660	Z1 - Demonstration Company	User SP1	23/09/94 11:27:18
Invoice Cross Reference			
Print Invoices After..... <u>1/09/94</u>			
F3=Exit F8=Submit Report			

Fields:

Print Invoices After

Enter the date after which consolidated invoices should be included.

Select **F8=Submit Report** to submit the report.

Tax Postings Reconciliation Report

3/WTR

This report prints a reconciliation between postings made in the World Trade VAT accruals process and the VAT posting made as part of the final invoice posting. These may be different because either a variation in exchange rates occurred, or because the invoice value was different to the order value, and the latter was used as the basis for the accrual.

The report attributes are:

- Frequency - As required.
- Stationery - Standard listing paper.
- Print Positions - 132.
- New Page - Page overflow.
- Totals - None.
- Sequence - General Ledger session number.

Reconciliation Of VAT Transactions Screen

To display this screen, select Tax Posting Reconciliation.

Use this screen to define which General Ledger document references or World Trade session number to list.

WT826	Z1 - Demonstration Company	USER SP1	23/09/94 11:28:08
-------	----------------------------	----------	----------------------

Reconciliation of VAT Transactions	
Select :	
Range of General Ledger Document References : From . . . _____	
To . . . _____	
OR	
World Trade Session Number	946 Number: *LAST

F3=Exit	F8=Submit
---------	-----------

Fields:

Range Of General Ledger Document References

Enter the range of General Ledger document references to include.

To start the search from the first reference, enter *FIRST in the From field.

To end the report at the last reference, enter *LAST in the To field.

World Trade Session Number

Enter the World Trade session number to process.

Enter *LAST to specify the last session run in World Trade.

Tip: If you enter no selection criteria, the report will include all GL document references.

Press **Enter** to confirm selection for the report.
Then select **F8=Submit** to submit the report.

Movements Register Report

4/WTR

This report prints a register of temporary movements. It is based on values entered in the Movement Reference field in Movement Maintenance. This links either a sales order for a return of goods with a purchase order for a temporary inward movement; or a purchase order for a return of goods with a sales order for a temporary outward movement.

To do this, enter, within Movement Maintenance, the order number of the first movement, concatenated with the relevant line number, as the movement reference for the second movement record.

This is a temporary movement report so only movements with a nature of transaction 40 (Movement before process/repair), 50 (Movement after process/repair), or 58 (process value) are selected.

Example: Movement from Stockroom A to Stockroom B for repair

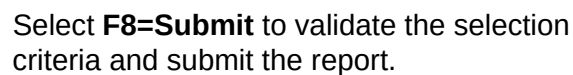

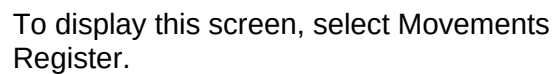

Process a sales order from Stockroom A detailing the goods to be moved. Process a purchase order to receive the goods into Stockroom B. Maintain purchase order and Sales order overrides to make sure the correct nature of transaction is showing (in this case 40).

Finally, update the movement reference field of the movement record for the second movement, the purchase. The appropriate entry is the sales order number concatenated with the line number on the order which detailed the goods being moved for repair.

- Sales order number - 00000121
- Sales order line - 002
- Purchase order number - P001934
- Movement reference field;
 - Sales order - Blank
 - Purchase order - 00000121002.

The report attributes are:

- Frequency - As required.
- Stationery - Standard listing paper.
- Print Positions - 132.
- New Page - Page overflow.
- Totals - None.
- Sequence - Order number.

VAT Postings Reconciliation Report

5/WTR

This report prints a list of all the VAT transactions in General Ledger for a specified time. The list links the VAT transactions with the appropriate World Trade movements.

The report attributes are:

- Frequency - As required.
- Stationery - Standard listing paper.
- Print Positions - 132.
- New Page - Page overflow.
- Totals - None.
- Sequence - Tax point date.

VAT Analysis By Period And Currency Report

6/WTR

This report prints a version of the General Ledger VAT Subsystem report in a selected currency. All prime currency amounts are converted to the reporting currency using the Customs and Excise exchange rate code. This report can produce a VAT return in a currency other than the General Ledger Base currency.

The report attributes are:

- Frequency - As required.
- Stationery - Standard listing paper.
- Print Positions - 132.
- New Page - Page overflow.
- Totals - None.
- Sequence - VAT Code.

VAT Report By Period and Reporting Currency Screen

To display this screen, select VAT Analysis By Period And Currency.

Use this screen to produce a VAT return in a specified currency, for specific VAT periods.

WT850	Z1 - Demonstration Company	User SP1	23/09/94 11:32:40
VAT Report by Period and Reporting currency			
Select :			
Range of VAT periods from: 9403 to: 9403			
Detailed report 0 (0=No, 1=Yes)			
Reporting currency?.. ESP			
Customs and excise rate code CURC			
F3=Exit F4=Prompt F8=Submit			

Fields:

Range Of VAT Periods

Enter the range of VAT periods the report is to cover.

Detailed Report

Enter one of the following:

0 - No. To produce a summary report.

1 - Yes. To produce a detailed report.

Reporting Currency

Enter the currency for the report.

Press **Enter** to validate and confirm the selection criteria. Then select **F8=Submit** to submit the report.
