```

Fields:

Customer

Enter a customer code or ? to display a Customer Scan Window. An incomplete customer name or number can be entered to search for a contract. This window will only present customers that are registered with the Advanced Customer Scheduling/Advanced Customer Shipping products.

Item

Enter an item code or ? to display an Item Scan Window. An incomplete item name or number can be entered to search for a contract. This window will only present items that are registered with the Advanced Customer Scheduling/Advanced Customer Shipping products.

Customer Part

Enter the customer part number as part of your contract search criteria.

Item Model Year

Enter the item model / year as part of your contract search criteria.

OR

Contract Number

If a valid contract number is entered, then the program will jump to the next screen without displaying the Contract Scan Selection Screen..

If the contract number is not known, enter a blank in this field to display a Contract Scan Selection window. Entries made in the Customer, Item, Customer Part and Item Model Year fields can be used to narrow down the list of contracts displayed.

Functions:

F10=Additional Search

Will display the Additional Contract Characteristics Panel.

F18=Current Requirements

Displays the Current Requirements Screen for the selected details.

Contract Search Selector Screen

Enter a blank in the Contract Number Field in the Contract Enquiry Screen to display the Contract Search Selector Screen.

```

```

Fields:

Customer

Enter a customer code or ? to display a Customer Scan Window. An incomplete customer name or number can be entered to search for a contract. This window will only present customers that are registered with the Advanced Customer Scheduling/Advanced Customer Shipping products.

Item

Enter an item code or ? to display an Item Scan Window. An incomplete item name or number can be entered to search for a contract. This window will only present items that are registered with the Advanced Customer Scheduling/Advanced Customer Shipping products.

Customer Part

Enter the customer part number as part of your contract search criteria.

Item Model Year

Enter the item model / year as part of your contract search criteria.

OR

Contract Number

If a valid contract number is entered, then the program will jump to the next screen without displaying the Contract Scan Selection Screen..

If the contract number is not known, enter a blank in this field to display a Contract Scan Selection window. Entries made in the Customer, Item, Customer Part and Item Model Year fields can be used to narrow down the list of contracts displayed.

Functions:

F10=Additional Search

Will display the Additional Contract Characteristics Panel.

Contract Search Selector Screen

Enter a blank in the Contract Number Field in the Contract Prices Enquiry Screen to display the Contract Search Selector Screen.

```

Despatches

3/ACE

This Enquiry enables you to view the status of ships for a selected schedule. The following status's are shown:

- Consignments picked but not shipped
- Ships confirmed but not invoiced
- Invoiced ships.

Despatches Enquiry Screen 1

This screen allows you to select a schedule or to select from a prompt on Customer / delivery point or Item / Stockroom.

Select Despatches from the menu to display the first Despatches Enquiry screen.

```

```

Fields:

Customer

Enter a customer code or ? to display a Customer Scan Window. An incomplete customer name or number can be entered to search for a customer. This window will only present customers that are registered with the Advanced Customer Scheduling/Advanced Customer Shipping products.

Schedule Number

Enter the schedule number.

Item Code

Enter an item code or ? to display an Item Scan Window. An incomplete item name or number can be entered to search for an item. This window will only present items that are registered with the Advanced Customer Scheduling/Advanced Customer Shipping products.

Stockroom

Enter a stockroom code.

Press **Enter** to display the second Despatches Enquiry screen.

Functions:

F6

Contract by customer. If you enter a customer code, then press **F6=Contracts** by customer, the system will list all contracts for that customer code.

F7

Contracts by item. If you enter an item code, then press **F7=Contracts** by item, the system will list all contracts for that item code.

Press **Enter** from the first Despatches Enquiry screen to display second the Despatches Enquiry screen.

The customer account code, item and stockroom codes are accessed from the schedule header record for the selected schedule.

- On pick - the consignment pick / ship note is produced, but ship is not confirmed.
- Shipped - ship has been confirmed but the invoice is not printed.
- Invoiced - the invoice has been printed.

The cumulative shipped quantity is taken from the schedule Header record and recorded against the first (i.e. latest) shipped or invoiced line. Lines on pick are excluded from the cumulative calculation - these lines will display a blank cumulative quantity.

Note: If the cumulative shipped quantity has been manually adjusted it may not match the sum of the individual ship quantities. Therefore, if a cumulative calculation results in a negative value, a cumulative of zero will be displayed.

Note: If the lines are priced through SOP Price and discount lists (this will be when the customer is set for 'price at despatch'), then the invoice line price, discount and value can be accessed through the Invoice Enquiry by selecting the line with a 1. In this case, contract pricing is not used

*and the contract price column on this screen
would display a zero price.*

Each shipped or invoiced line may be selected for a detailed Sales Order Processing Invoice Enquiry by entering 1 in the select field on the left of the screen. This selection is not available against lines 'on-pick'.

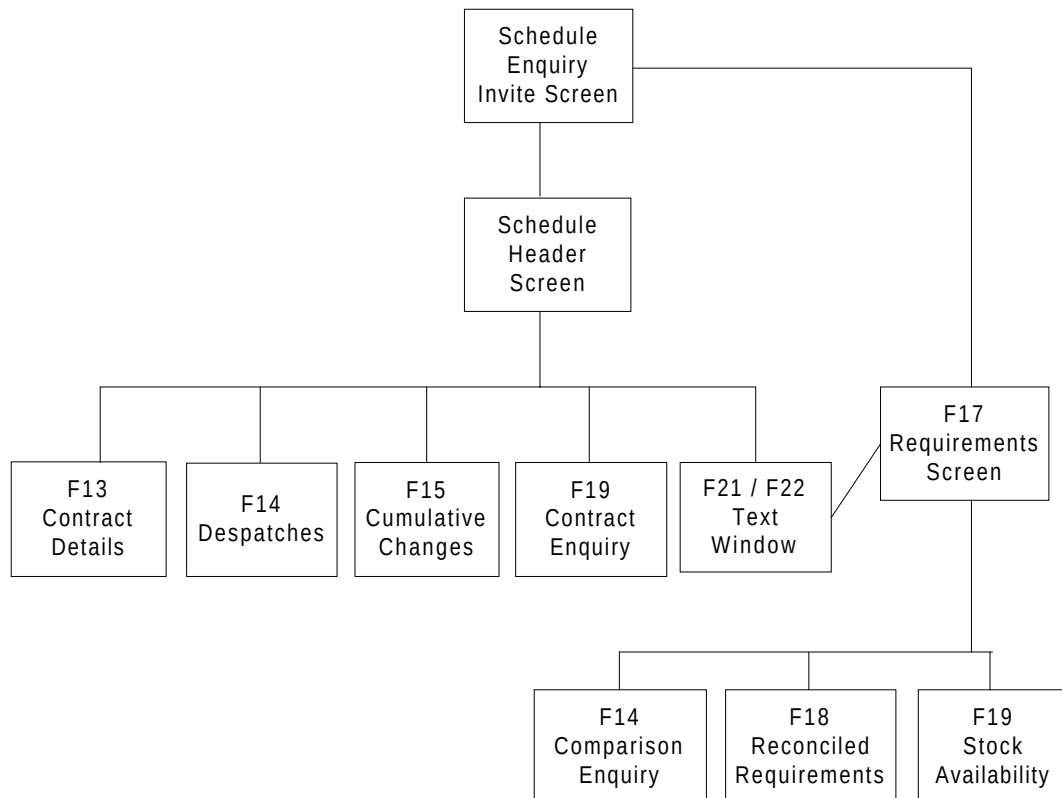

Schedules

1... 4/ACE **2...**

The Schedule Enquiry function is accessed either via the Schedule Enquiry option on the Advanced Customer Scheduling Enquiry screen, from Schedule Manipulation via a function key, or from the Contract Enquiry option via a function key.

This Enquiry may be called for a New Schedule, the Current Schedule, or Historical Schedules.

Schedule

11/ACE

This report will print schedule details located from the initial selections screen, and will allow the data to be printed in either 'as sent by customer' or 'reconciled' format.

Schedule Report Screen

Enter the relevant selection details onto the screen prior to submitting the report to a batch job to print.

At least one of the three main selections must be completed. All selections allow for a range to be entered.

Select Schedule from the menu to display the Schedule Report screen.

Fields:

Customer

Enter a customer code or ? to display a Customer Scan Window. An incomplete customer name or number can be entered to search for a customer. This window will only present customers that are registered with the Advanced Customer Scheduling/Advanced Customer Shipping products.

Item

Enter an item code or ? to display an Item Scan Window. An incomplete item name or number can be entered to search for an item. This window will only present items that are registered with the Advanced Customer Scheduling/Advanced Customer Shipping products.

Contract

Enter a contract or a range of contracts. This field is optional.

If a start code is entered, the report will only print the details relating to that entry. If a specific code is entered in the from and to fields, then the report will list only those details within that range.

Sequence

This field is mandatory and will determine that report sequence. Valid entries are 1, 2, and 3. The default sequence is:

- 1 - Customer.
- 2 - Item.
- 3 - Contract.

Report Selections

Requirements

This flag determines the requirements details to be presented on the report - whether they are as the customer sent, or the reconciled details. The default is 1 - as sent. Valid entries are:

- 0 - Reconciled.
- 1 - As Sent.

Schedule Type

This determines which type of schedule data to include on the report. The default is 0, release details. Valid entries are:

- 0 - Release.
- 1 - DCI / RAN.
- 2 - Both.

Schedule Version

This flag will default to 0, current only. Valid entries are:

- 0 - Current Only. This will cause only the current schedule details to be reported.
- 1 - All. This will cause current and history details to be reported.
- 2 - Specific. This will allow an entry in the Ref / revision fields below to be made.

Reference / Revision

Entry in this field is only allowed if the Schedule Version field flag is set to 2. The report will only print details for the specified internal ref / revision values.

Press **Enter** to validate the field entries.

Press **F8=Submit** to submit the report to print.

Schedule Issue History

12/ACE

This report compares consecutive Schedule issues (reference / revision) across time buckets. It lists all releases of the selected Schedule bucketed into weeks and will accumulate and print the actual shipped quantity for each of those weeks.

Schedule Issue History Report Screen

Enter either a customer number, a contract number, or an item number and a specific start week number.

Select Schedule Issue History from the menu to display the Schedule History Report screen.

```

```

Fields:

Customer

This field is optional. Enter a customer code or ? to display a Customer Scan Window. An incomplete customer name or number can be entered to search for a customer. This window will only present customers that are registered with the Advanced Customer Scheduling/Advanced Customer Shipping products.

Item

This field is optional. Enter an item code or ? to display an Item Scan Window. An incomplete item name or number can be entered to search for an item. This window will only present items that are registered with the Advanced Customer Scheduling/Advanced Customer Shipping products.

Contract

Enter a contract or a range of contracts. This field is optional.

If a start code is entered, the report will only print the details relating to that entry. If a specific code is entered in the from and to fields, then the report will list only those details within that range.

Week Number Range From

This field is mandatory. Enter the week number to start reporting from, and to limit the report. The entries may not be more than 52 weeks apart. The earliest ref / revision containing the start week number as a requirements quantity will be the first

to be reported, up to the latest ref / revision received for the contract, subject to the 'to week' entry. The start week value must be in the past. The week numbers must exist on the Inventory Calendar.

Include DCI Details

This will default to 0. Valid entries are as follows:

0 - No. Only release details will be reported on.

1 - Yes. Relevant DCI type schedules will be reported as well as the released details for the matching contracts. DCI details will be included in schedule issue date order with the releases. RAN type schedule records will be excluded.

Press **F8=Submit Job**. The system will validate the entries and submit the report to print.

Outstanding Schedule Analysis

13/ACE

This report enables you to view arrears / future outstanding schedules by user defined time buckets. You can sequence the report by a wide range of customer and item attributes. Value, cost and margins are printed on the report.

Outstanding Schedule Analysis Report Selection Screen

Select Outstanding Schedule Analysis from the menu to display the Outstanding Schedule Analysis Report screen.

00-35  SF  MW  KS  IM  II  KENB20A  PET007S2
  
```

The last run details and default column weeks are retrieved, if no record exists for the company, the details will default to blanks.

The current period details are retrieved by using the defaults calendar control file. The default calendar is then used with the current date to access the calendar file and retrieve the current year, week and period.

Warning: If a calendar is not set up for the default calendar code then an error message will be issued and you will not be allowed to submit the job until the calendar is created.

Note: You must ensure that the calendar is defined at least as far ahead as the last reporting column specified. The current year, period, and week may be overridden by the user. Override details must be valid on the calendar file.

Fields:

No Of Weeks

Any number of weeks from 1 to 99 may be entered for each column. A column cannot be left blank if a subsequent column has been specified.

Press **F8=Submit** to submit the report for printing. The report will print wither a summary by

minor item group, or details by item within minor item group. The column time buckets will be set up starting from the current week on the default calendar. The 'overdue' bucket will contain values for the specified number of weeks before the current week.

Retrospective Invoice

14/ACE

This report calculates the difference between the amount that was actually invoiced to a customer based on the contract charge from price, and the amount that should have been charged based on the contract effective price.

Retrospective Invoice Report Screen

Sequence Of The Report

The sequence of the report is: Customer / Item / Invoice date, with totals by customer and item. Totals calculated are:

- Actual amount invoiced
- The re-calculated value based on the contract effective price
- The difference between the two.

Select Retrospective Invoice from the menu to display the Retrospective Invoice Report screen.
