Chapter 3

Enquiries and Reports

Shipping Requirements Enquiry

1/ADE

This enquiry displays a summary of the shipping requirements for a particular customer, sequenced by item or date, with a drill down by item.

The main purpose is to illustrate what must be shipped to a particular customer on/by a specified date. In addition to specifying a customer, you can limit the enquiry for a specified range of stockrooms, items and/or contracts. You can choose to include all outstanding requirements or just those which have not yet been allocated by a consignment.

Shipping Requirements Enquiry Screen 1

Select the Shipping Requirements Enquiry option from the menu to display the first Advanced Shipping Requirements Enquiry Screen.

AS505	Z1 - GB Demonstration Company	User GBJBANB1	29/05/98 12:30:16

Outstanding build req.s only? ... 1 (0=No, 1=Yes)			
F3=Exit F4=Prompt			
MA	a	17/032	

Fields:

Customer

Enter ? to display a Customer Search Window. An incomplete customer name or number can be entered to search for a customer. This window will only present customers that are registered with the Advanced Customer Scheduling / Advanced Customer Shipping products.

Preferred Stockroom

Optionally enter a stockroom, or a range of stockrooms. This limits the selection of requirements to display by stockroom.

If you leave the range start blank, the system will include everything up to and including the range end. Leaving the range end blank will only include requirements for the first stockroom.

Note: If you are using despatch profiles rather than single stockrooms on your contracts, the preferred stockroom is the first stockroom in the relevant despatch profile sequence. This is stored on the Reconciled Requirements records.

Item Range

Enter an item code or ? to display an Item Scan Window. An incomplete item name or number can be entered to search for an item. This window will only present items that are registered with the Advanced Customer Scheduling / Advanced Customer Shipping products.

Leaving the range start blank will include everything up to and including the range end. Leaving the range end blank should include only requirements for the first item.

Contract Range

Optionally enter a contract or contract range. This limits the selection of requirements to display by contract.

Leaving the range start blank will include everything up to and including the range end. Leaving the range end blank should include only requirements for the first contract.

Note: The customer prompt exists and allows search on customer order number amongst other things. Hence this enquiry could be used in response to a customer enquiry.

Sequence

The selected records can be displayed in item or date sequence. The default is Date Sequence. This is a mandatory field. Enter one of the following:

0 to list the report in date sequence.

1 to list the report in item sequence.

Outstanding Build Reqs Only?

This field applies to the whole of the enquiry session. Its effect is to display only customer/item requirements for the given date which are not yet fully allocated and/or built.

This flag will default to 1 (yes). If the flag is set to 0 (no), all item requirements for the customer/date will be displayed, regardless of the quantities left to allocate/build.

Press **Enter** to display the second Shipping Requirements Enquiry Screen.

Shipping Requirements Enquiry Screen

This screen displays records selected on the Shipping Requirements Enquiry Selection Screen, which have been sorted either by date or item. The list will be summarised on change on date/item/contract. RAN records will not be summarised, but displayed separately.

Press **Enter** to display the second Shipping Requirements Enquiry Screen.

Shipping Requirements Report

11/ADE

This provides a hard copy equivalent of the shipping requirements enquiry. It is expected that this will be used in environments where allocation is of little importance, organisations can use this report as a work-to list and update the system retrospectively.

The report lists the following:

Customer

Item

Contract

Ship Date and Time

Despatch Profile and/or Preferred Stockroom

Quantity to be allocated to a consignment

Call Off Reference.

If required the report will list stock availability for the relevant item and a list of 'open' consignments for the relevant customers.

Shipping Requirements Report Selection Screen

Select the Shipping Requirements option from the menu to display the Advanced Shipping Requirements Listing Screen.

Fields:

Customer

Enter a customer code or ? to display a Customer Scan Window. An incomplete customer name or number can be entered to search for a customer. This window will only present customers that are registered with the Advanced Customer Scheduling / Advanced Customer Shipping products.

Date Range

Enter a date range. To select requirements with a required ship date on or before today (i.e. inclusive of arrears), enter the first date as a blank and the second to today's date.

Item Range

Enter an item code or ? to display an Item Scan Window. An incomplete item name or number can be entered to search for an item. This window will only present items that are registered with the Advanced Customer Scheduling / Advanced Customer Shipping products.

Contract Range

Optionally enter a contract or contract range. This limits the selection of requirements to display.

Sequence

Sequence flags are on Customer, Date, Item and Contract. These will default to 1, 2, 3, and 4 respectively, but may be changed to reflect any order.

Preferred Stockroom

Optionally enter a stockroom or range of stockrooms. This will limit the selection of requirements.

Outstanding Build Reqs Only

This effect of this flag is to exclude completed or cancelled consignments from the report. The default is 1 (Yes). Enter one of the following:

- 1 - Exclude completed or cancelled consignments.
- 0 - Include completed or cancelled consignments. This field is mandatory.

Summarised Requirement Details

Enter one of the following options:

- 1 - Print consolidated requirement lines.
- 0 - Print individual requirement lines. The default is 1. This field is mandatory.

Print Availability/Consignment Detail

This flag determines whether to print availability and consignment details after each break (on change of item).

- 0 - No
- 1 - Yes.

The default is 1. This field is mandatory.

Press **F8=Submit Job** to submit the report to print. The system will display a confirmation screen. Press **F8=Submit** again to confirm.

Goods Not Invoiced

21/ADE

This option allows you to generate a report of goods which have been shipped or consumed but have not been invoiced.

Goods Not Invoiced Report Screen

This screen allows you to define the report that you want to generate.

Select Goods Not Invoice from the menu to display the Goods Not Invoiced Report Screen.
