Chapter 4

Enquiries

Enquiries Introduction

You can group the enquiries into one of three categories:

- Planning.
- Static Information.
- Status.

More simply you can regard these as:

- What is there to do?
- What are the parameters?
- Where are things?

The enquiries in each group are:

- DC and Centre Schedule Enquiries - planning.
- Distribution Item Master Enquiry - static information.
- Shipments In-Transit Enquiry - status.

View Schedule for DC Enquiry

1/DRE

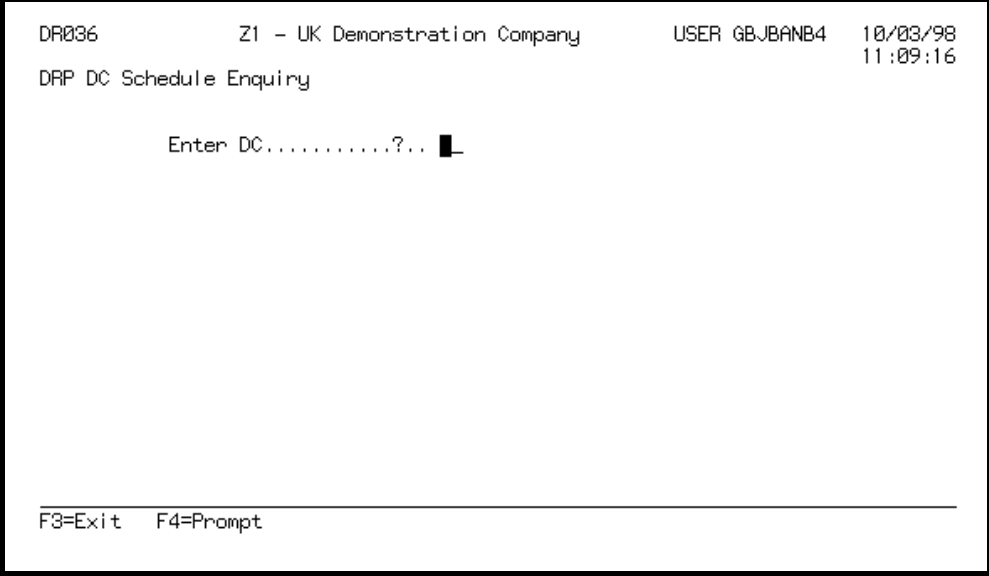

You use this enquiry to view the time-phased plan, per Item, created when you last evaluated the DC demand within a supply network.

The enquiry also provides details of actions suggested by DRP for the item.

DRP DC Schedule Enquiry Selection Screen

 Select View Schedule for DC.

You use this screen to select the DC for which you want to display the schedule.

```
DR036          Z1 - UK Demonstration Company      USER GBJBANB4   10/03/98
                                           11:09:16
DRP DC Schedule Enquiry

Enter DC.....?.. █

F3=Exit  F4=Prompt
```

Fields:

Enter DC

Enter a DC with periods and stockrooms and assigned to least one network.

 Press **Enter** to display the Schedule Enquiry
Item or Planner Selection Screen.

Schedule Enquiry Item or Planner Selection Screen

To display this screen, on the DRP DC Schedule Enquiry Selection Screen, enter a DC Code and press **Enter**.

Or On the DRP Centre Schedule Enquiry Selection Screen, enter a Centre Code and press **Enter**.

You use this screen to define the enquiry, by Item, Planner or a range of plan dates. You can only select one criterion for a particular enquiry.

```
DR0880          Z1 - UK Demonstration Company      USER GBJBANB4  10/03/98
DRP DC Schedule Enquiry                             11:09:40

DC..... D1 - 1

Optionally select one of the following:

  Item.....?.. █
OR
  Planner.....?.. 
OR
  Date last planned from...  to ...

F3=Exit  F4=Prompt  F12=Previous
```

Fields:

Item

Specify any item code. This does not need to be valid because the enquiry starts from the first item found after the value entered.

Or

Planner

Specify any DRP planner code. This does not need to be valid because the enquiry starts from the first item found after the value entered.

Or

Date Last Planned Range

Specify a range of valid calendar dates. The enquiry begins at the first item with a last planned date on or after the From date.

Note: Leave all selection fields blank to begin the

enquiry at the first valid item.

Press **Enter** to continue.

Schedule Enquiry Summary Screen

 To display this screen, press **Enter** on the Schedule Enquiry Item or Planner Selection Screen.

This displays the supply, demand and requirement quantities for each selected item and time period. This gives an overall picture of the supply and demand pattern and indicates where shortfalls of supply will occur.

The dates displayed are the start dates for each period. All figures are in terms of quantity rather than value. The overdue column includes orders with outstanding demand or supply. This does not include forecasts.

The system calculates the actual available stock as:

Previous available + Supply - Demand

The Net Requirement is the difference between supply and demand:

Demand + Stock Level Forecast + Safety Stock - Previous Planned Available - Supply

If the result is positive, there is a shortfall. If there is sufficient or excess stock, the output is blank.

The system calculates the planned available stock as:

Previous Planned Available + Plan Orders - Demand

The demand status can be:

SO - Sales Order Line

SX - Sales Order Line Excluded

DO - Distribution Order Line

DX - Distribution Order Line Excluded

FC - Sales Forecast

FX - Sales Forecast Excluded.

Note: This excludes Order Lines if the forecast is greater than the demand and vice-versa. There are no exclusions if you use consumption of forecast.

The Supply Status can be:

SP - Suggested Purchase Order Line

CP - Confirmed Purchase Order Line

SD - Suggested Distribution Order Line

DO - Distribution Order Line

TI - In Transit

GI - Received at Good Inwards

IS - Received at inspection

UP - Unconfirmed Purchase Order Line

FS - Stock Level Forecast.

The action suggested by DRP can be:

SP - Suggested Purchase Order Line

SD - Suggested Distribution Order Line

RI - Reschedule In (Expedite)

RO - Reschedule Out (Defer)

CQ - Change Quantity

CA - Cancel Order Line

RICQ - Reschedule In and Change Quantity

ROCC - Reschedule Out and Change Quantity.

*Note: To display the dates and/or quantities associated with these actions, select **F22=Detail Line**.*

Tip: You can use the page up and down keys to move up and down the supply and demand details.

Stock In Transit Enquiry

11/DRE

You use this enquiry to view distribution order lines in-transit between two selected stockrooms.

You have confirmed these items as despatched from the From stockroom (via Sales Order Processing or Warehousing), but not yet received at the To stockroom (via Distribution Requirements Planning).

Shipments In-Transit Enquiry Order Line Details Screen

To display this screen, on the Shipments In-Transit Enquiry Screen, enter the required details and press **Enter**.

This screen displays the distribution order line details. These details include:

- Originating and destination Stockroom and DC/Centres.
- Due date.
- Distribution order number and line number.
- Inventory Item code.
- Local stockroom at the DC.
- Despatched quantity and unit of measure.
- Lot number, if the item is batch, lot or serial controlled.
