Chapter 8

Enquiries And Reports

Parameter Enquiries

Enquiries exist for all the parameters that exist for Job Management. All existing data for parameters is displayed but cannot be maintained. The displays are formatted exactly as they appear in Parameter Maintenance.

Main Job Enquiry

1/JCH

This option shows financial details at various levels of detail.

You can choose to see summaries or details of a job. Once specific details are displayed you can drill down through all summary job levels to the individual transaction.

If you leave all the fields blank you will see a list of all job headers set up within Job Management with their respective variance values and percentages.

You access top level information, with further options to drill down further into the details of the job.

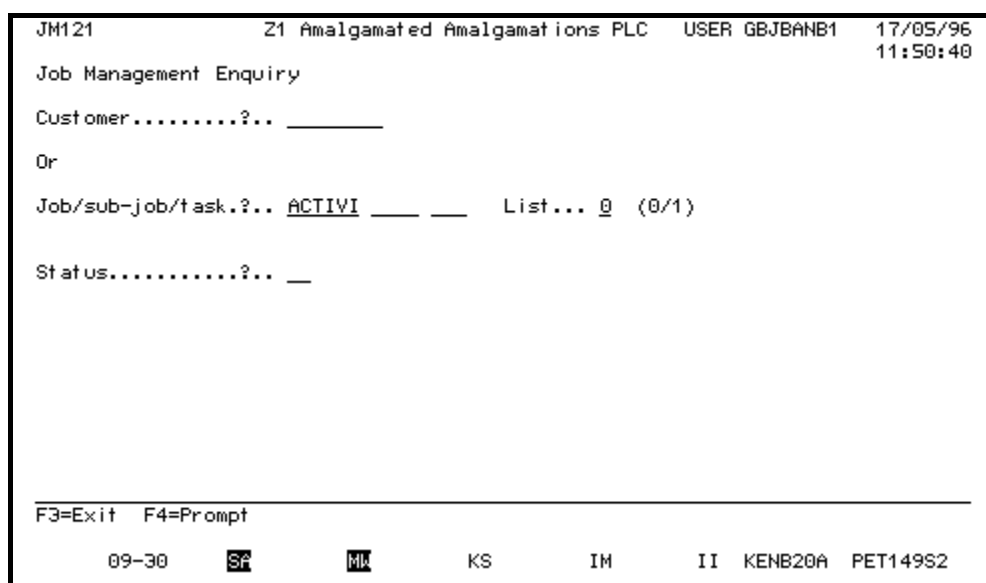

Tip: While you are using the enquiry you can change the job detail you are enquiring on by entering the required detail at the top of each enquiry screen.

Take the Main Job Enquiry option to see the Job Management Enquiry Screen.

Job Management Enquiry Screen

Job Management Enquiry

Customer.....?.. ____

Or

Job/sub-job/task...?.. ACTIVI ____ List... 0 (0/1)

Status.....?.. ____

F3=Exit  F4=Prompt

09-30  SF MW KS IM II KENB20A PET149S2
```

Fields:

Customer

Enter only a customer to display all main jobs for that customer.

Job/Sub-Job/Task

Enter a valid job/sub-job/task.

Enter job, sub-job and task, and set the list field to 0 for a job details enquiry screen.

Enter job only and set the list field to 1 for a list of sub-jobs.

Enter job and sub-job and set the list field to 1 for a list of tasks for that sub-job.

List

This field is relevant only if you have entered a job detail.

0 - The all jobs screen will display the job detail entered.

1 - The all jobs screen will list all lower-level jobs related to the job entered (e.g. all sub-jobs related to a job), with variance values and percentages. You have the option to display the details for that job detail or drill down further to display the task details.

Status

If you enter a status here, then any selection screen will display only those details with the specified status.

Job Management Enquiry All Jobs Screen

If you leave the selection screen blank and press **Enter** you will see a list of all main jobs.

1=Job data 5=Display sub-jobs						
F3=Exit F12=Previous						
08-02		SP	MK	KS	IM	II KENB20A PET149S2

Fields:

Option

Entering a 1 against the required job will display the job header details whilst a 5 will display all sub-jobs within the main job.

Status

The status codes for the job ('01' for an open job, '99' for closed, and any other user-defined status codes) are displayed against each job.

Variance Value

The variance is calculated as a comparison of budget and total costs (actual + committed costs). If the costs have exceeded the budget, then the variance value is shown as a negative.

Variance %

The percentage of budget that the variance value represents.

Enquiry All Sub Jobs Screen

If you wish to see a list of all sub-jobs for a given job, then enter that main job on the first screen and enter 1 in the 'List' field.

The main job values are displayed at the top of the screen, and the roll-up values are displayed for each sub-job.

Enquiry All Tasks Screen

If you wish to see a list of all tasks for a given sub-job, then enter that sub-job on the first screen and enter 1 in the 'List' field.

The information is given in the same format as for the sub-job.

Job Management Enquiry Job Details Screen

Enter 1 against any job detail listed to see its details displayed.

F22=External text					
04-14 SP MK KS IM II KENB20A PET149S2					

Fields:

Actual Costs

These costs accumulate only after cost transactions have been posted.

Committed

These are costs to which the job detail has become committed via purchase orders and parts lists.

Total Cost

Actual cost + committed cost.

Budget

The budget value for this job as defined against the company default budget code.

Variance

Budget less total cost.

Invoiced

The amount that has actually been invoiced. It does not include amounts pending review.

Note: The above descriptions are rolled up figures for the whole job. If you wish to

*investigate further any details for this job level,
press **F13=Finance** for a breakdown of financial
summary data and rolled up data.*

Financial Details Screen (F13)

When you have displayed the details of any job/sub-job/task you can press **F13=Finance** from the main job enquiry to see the Financial Details Screen.

The financial details for the job number, customer is displayed at the top of the screen. Other relevant information such as the job type, price type, status, review flag and income currency is also displayed.

This Level/Rolled Up

Each value appears in two columns, This Level and Rolled Up.

In Job Management, costs and income entered at a lower level are automatically rolled up to the next level. This enables you to examine the values attributed to work carried out just at this level as well as subordinate levels.

If the level you are enquiring on is in fact the lowest level, then, of course, the rolled up costs and income are the same as those in the This Level column.

The following is an example of costs entered:

Job	Sub-Job	Task	Transaction	This Level	Rolled Up
J1				= 20.00	= 135.00
			Timesheet	10.00	50.00
			Dir trans	00.00	45.00
			Emp exp	10.00	40.00
J2	SUB1			= 60.00	= 115.00
			Timesheet	40.00	40.00
			Dir trans	00.00	45.00
			Emp exp	20.00	30.00
J1	SUB1	001	Timesheet	00.00	00.00
			Dir trans	45.00	45.00
			Emp exp	10.00	10.00

The costs have been entered and the totals would be displayed here (the figures prefixed by = in the example).

5-23	SA	W	KS CL IM DM II STUD140 KB PKH317S1

Fields:

Purchase Commitments

The value of all related purchase order lines not yet matched to a supplier invoice.

Inventory Commitments

The value of all related parts on a parts list not yet despatched.

Labour Commitments

The value of all labour commitment.

Total Commitments

The total of Purchase Management, Inventory and labour commitments.

Actual Cost

This includes all posted costs.

Total Cost

Actual costs + committed costs.

Default Budget Code

The current budgeted costs are displayed.

Variance Value

Budget less total costs.

Variance

Expresses the variance value as a % of budget.

Estimated Hours

This value is from input to the job details.

Actual Hours

The actual hours to date entered through timesheet transactions.

Est. Hours Left

Estimated hours less actual hours.

Selling Price

The amount entered on the job details maintenance.

Invoice To Date

Invoice amounts that have been generated (and reviewed if applicable).

Est. Value Left

The value of revenue yet to be received, i.e. selling price less invoice to date.

Functions:

F14

Commitments. When you select this button, a window asks you to select either inventory (1), labour (2) or purchase (3) commitments. Make your selection and press **Enter**. You will then see either the Inventory Commitments (SOP Parts) Screen, the Labour Commitment Screen, or the Purchasing Commitments Screen.

Fields:

Sell Price

The selling price relates to the selling price of the job number at the top of the screen.

Original Values

Original values for both prime and cost currency are displayed with any associated VAT value and code on the left hand side of the screen. The original value is that entered when the original stage payment was recorded.

Actual Values

Actual values for both prime and cost currency are displayed with any associated VAT value and code on the left hand side of the screen. Actual values are shown as the value invoiced may have been changed during the review process.

Invoice Number

This field will show:

The invoice number

'In Revw', meaning that the invoice is in review

Blanks

Released Flag

1 - The original amounts have been fully released into profit and loss.

Released Value

The released value to date. If this amount is greater than zero, then further details can be enquired upon by using **F13=Release Breakdown**.

Retention %

This is the memo value as entered in stage payments maintenance.

B/S Income Account

If the invoice has been generated and deferred, the balance sheet account is displayed.

P/L Income Account

When the stage payment is released, or not deferred, the P&L account is displayed.

Functions:

F13

Release Breakdown. This displays the release breakdown for a stage payment. This screen displays for each released cost the document reference, release value prime, release value base, currency and cost. The top of the screen displays the status, the total cost to date (not necessarily released), and the internal reference number applicable to the job number.

*Note: If the income remains fully deferred with a zero release value then no details can be displayed using **F13=Release Breakdown**.*

Cost Breakdown Screen 1 (F18)

Press **F18=Cost Breakdown This Level** from the Financial Details Enquiry to display the first Cost Breakdown Screen.

This shows a summarised breakdown of cost against expense types against the job number. If you have budgeted against expense type, then these budgets are seen against their actual costs to date. The variance of actual costs against budget costs is shown.

```

Fields:

Option

- 1 - Display the transactions that make up the actual cost of this expense type.
- 2 - Cost by period.

Total Cost

The total cost value relates to the total of expense types for this job detail.

Functions:

F13

Rolled Up. This enables you to toggle between rolled up values and 'this level' values associated with the job level of your job number. If the job number is at the task level then of course the rolled up values will not differ from 'this level' values.

Cost Breakdown Screen 2

Enter 1 against an expense on the first Cost Breakdown Screen to see the second Cost Breakdown Screen.

For each line the transaction source, type and date, any internal reference and cost values are displayed.

The total cost at the top of the screen is the total value of the selected expense type for this job detail.

09-02 09 KS IM II KENB20A PET149S2			

Fields:

Option

The following options (where available) access data as follows:

- 1 - Select transaction details from Job Management.
- 2 - Source details (if other than Job Management - e.g. Accounts Payable).
- 3 - Destination details, i.e. General Ledger.

Cost Comparison

3/JCH

Take the Cost Comparison option. On the selection screen you can enter either a job or an item, or both:

- If you enter only a job, subsequent screens will require you to select a sub-job and task (where relevant) and an item, from lists displayed.
- If you enter only an item, subsequent screens will require you to select a job, sub-job and task from lists displayed.
- If you enter both a job and item, and both the job and item appear on more than one task, a subsequent screen will require you to select a task, and then a contract, if more than one exists.

In other words, you must tell the system the job detail, item and contract before you can get to the next screen.

Once you have made these selections you will see the Cost Comparison Details Screen.

Cost Comparison Details Screen

This screen is displayed when you have selected the job detail, item and contract on selection screens.

Note that all variances shown on this screen are calculated according to the following method:

$$QvsR = \left(\frac{R}{Q} \times 100 \right) - 100$$

```

Fields:

Unit Values

Cost - the total of the cost elements.

Value - the sales value.

Margin % - the price divided by the cost, multiplied by 100, minus 100. This would mean that an item at a cost of £5 with a 100% mark up will be selling at £10.

Quoted

The quotation's sales value is displayed if the Production costs originated from a quotation.

Revised

The job's sales value is displayed.

Shipped

The shipped value is displayed from Advanced Customer Scheduling. This is the value of the shipped item on contract.

Variances

QvsR%

The percentage variance between the quoted and revised values is displayed.

QvsS%

The percentage variance between the quoted and shipped values is displayed.

RvsS%

The percentage variance between the revised and shipped values is displayed.

Based On Quantity

Displayed as applicable.

Quote/Sub-job/Task

If the detail originated from a quotation, that quotation is shown here.

Functions:

F13

Finance. This displays the Job Management Financial Details enquiry screen.

F19

Contracts. This displays the Advanced Customer Scheduling Contract Enquiry screen.

F20

Quotation. This is available only if the Production costs originated in a quotation. The Quotation Enquiry Details Screen is displayed.

Cost/Price List Enquiry

4/JCH

Use this option to enquire on cost and price lists set up for jobs.

Cost/Price List Enquiry Selection Screen

Take the Cost/Price List option from the menu to see the Cost/Price List Enquiry Selection Screen.

                        (Leave blank for all)
Sub-job status.....  -  1=Open
                        2=Closed
                        3=Both

-----
F3=Exit  F4=Prompt  F8=Submit report

07-26    MW      KS      IM      II  KENB20A  PET149S2
  
```

Fields:

Job Number

Enter the range of jobs you wish to report on. Leave blank to select all jobs.

Sub-Job

Enter the range of sub-jobs you wish to report on. Leave blank to select all sub-jobs.

Sub-Job Status

This field is mandatory entry. Enter the sub-job status you wish to report on:

- 1 - Open sub-jobs.
- 2 - Closed sub-jobs.
- 3 - All sub-jobs.

F8=Submit Report to submit the report.

Note: This report is similar in format to the job analysis report but breaks the report further by

sub-jobs.

Transactions By Task Report

1... 2... 3/JCD

Each report displays details in actual revenue to date, any commitments outstanding (i.e. Purchase Management). Transaction by Task enables all your transactions that you have entered to date to be viewed – displayed the expense type, reference numbers and amount with internal text attached.

The 'From', 'To' range is for an alphanumeric range that begins with A and ends with 9 for each character.

Take the Transactions by Task option to see the Transactions by Task Report - Selection Screen.
