Fields:

Report By

Enter the type of report you want.

1 - Pick Location. To produce a report displaying the status and contents of the pick locations for the items selected.

2 - Fixed locations. To produce a report displaying the status and contents of the fixed locations for the items selected.

3 - Location rule by item. To produce a report displaying, for each item selected, the status and contents of the locations identified using an item rule. Enter the item rule in the window displayed when you press **Enter**.

4 - Location rule by area. To produces a report displaying the status and contents of the locations identified using an area rule. Enter the area rule in the window displayed when you press **Enter**.

5 - Warehouse. To produce a report displaying the status and contents of all the locations within the warehouse.

6 - Area. To produce a report displaying the status and contents of all the locations within a selected area. Enter the area required in the window displayed when you press **Enter**.

7 - Range of locations. To produce a report displaying the status and contents of a range of locations. Enter the location range in the window displayed when you press **Enter**.

8 - Empty locations. To produce a report displaying all the empty locations within the warehouse.

Item/Location Seq

Enter one of the following:

- 1- Item. To sequence the report by the items involved. This report only includes used locations. You cannot sequence the Empty Locations Report by item.
- 2- Location. To sequence the report by location. This report includes both empty and used locations.

Location Detail

Enter one of the following:

- 1- Summary. To display only the location and status.
- 2- Detail. To display all the details for the location, together with statistical information, such as number of receipts, date last counted and so on.

Item Detail

Enter one of the following:

- 1- Summary. To display only the basic item details, such as lot number, rotation date, pack type, physical stock in the location and available stock in the location.
- 2- Detail. To display further details about the current stock status in the location, such as physical stock, committed to sales, committed to production, committed to transfer, frozen, available and planned in.

From Item/To Item

Enter the range of items for which you want to produce the report. The items specified must exist on the item master file, as set up in Inventory Management.

From Lot/To Lot

Enter the range of lot numbers for which you want to produce the report. The lot numbers must exist for the selected item.

Max. Locations

Enter the maximum number of locations you want the report to process. Use this to limit the size of potentially large reports.

To report on all locations set the value to 0 or leave it blank.

Press **Enter** to submit the report.

Unconfirmed Action Lists Report

21/WHR

It is vital that all of the work requested in the warehouse is complete. This report lists all unconfirmed action lists up to the nominated date. You can include any of the three types of action lists in the report.

- Frequency - At least daily.
- Stationery - Standard listing, paper.
- New Page - Overflow.
- Totals - None.

Unconfirmed Action List Report Request Screen

Select Unconfirmed Action Lists.

Use this screen to specify the content of the unconfirmed action list report.

WH904	Z1 - Demonstration Company Central Warehouse	User SP1	01/09/94 12:00:00
-------	---	----------	----------------------

Unconfirmed Action List Report Request

Cut-off date..... 1/09/94
