Chapter 5

Enquiries

Types Of Enquiry

Enquiries in the Inventory Management application are designed to allow a layered approach to the review of a style. They include:

- Descriptions and codes.
- Balances at stockrooms.
- Movements.
- History.

Product/Style Search

This function is used throughout the Inventory Management application to assist in identifying a required style. The same style search is used in enquiry, processing and maintenance as well as being used in all applications where a style number is used. A style may be selected in one of the following ways:

Item Reference (Search Type 1)

The item reference search displays all the styles, in style number sequence, beginning with the search criteria entered. The search criteria can either be a style or the beginning characters of a style code.

Description (Search Type 2 or 3)

The search facility can be used on either the Inventory or Purchasing description.

If the Inventory description search facility is used, a selection is made based on the Inventory search word which currently exists for this style. These are generated at style maintenance time based on the first 20 words from the style description and the first three lines of the external text for the style.

Matrix Style (Search 1, 2 and 3)

Enter a valid number to display in matrix form the valid colour/size/fitting attributes for this style. The required colour/size/fitting combination can then be selected by entering a 1 in the matrix.

The style search facilities involve two particular screens:

Style Search - parameters.

Style Search - detail parameters.

The style search is invoked by entering a '?' in the Style number field and pressing **F4**. This results in a window being displayed,

Enter the search type, up to 20 search words or initial characters of search words. A style is then selected on all the selected words.

The selected items are displayed in a window:

The following actions are available:

- The screen may be paged up and down.
- A displayed style may be selected by entering 1.
- Any style may be selected by entering the part number.
- The display may be positioned at a nominated point in the list.
- Enter a 1 to display a matrix or 2 to display a carton.

Stock In Transit

1/STINE

The purpose of this enquiry is to carry out enquiries on distribution order lines in transit between a selected Centre and Distribution Centre (DC).

These items have been confirmed as despatched from the Centre (via Sales Order Processing or Warehousing), but not yet confirmed as received at the DC (via Distribution Requirements Planning).

Select the Stock In-Transit option to display the Stock In Transit enquiry screen.

Shipments In Transit Enquiry Screen 1

Select the Stock In-Transit option to display the Stock In Transit enquiry screen 1.

This screen enables you to select all the distribution order lines in-transit between a supply Centre and a selected DC, or to display details of lines for one specific order in-transit.

A list of all DCs may be selected. A list of all Centres may be selected.

Fields:

From Stockroom

Must be defined, to at least one Network within DRP, as a valid DC code.

To Stockroom

Must be defined to at least one Network within DRP, as a valid Centre code.

Distribution Order Number

A valid distribution order, i.e. one confirmed as despatched at the Centre and not yet confirmed as fully received at the DC.

Note: An order may be selected without specifying its relevant Centre or DC.

On entering a valid DC/Centre combination and/or order number, the second screen is displayed.

Shipments In Transit Enquiry Screen 2

The screen is displayed when you select a DC/Centre combination on the initial screen and press **Enter**.

The screen is used to display the distribution order line details.

Fields:

From/To Stockroom

As entered in Shipments In Transit Enquiry Screen 1.

Date

Date of despatch from Centre.

Order

Distribution order number.

Lin

Distribution order line number.

Item

The code for the item within Inventory Management.

SR

Local stockroom for the item at the DC.

Quantity

Despatched quantity at the Centre.

Lot Number

If the item is lot, batch or serial controlled, the lot number is displayed.

Where appropriate the stockroom, pack, lot number and rotation date may be amended when confirming receipt of the shipment (via the DRP Processing option).

Further pages of lines meeting the selection criteria, if any, may be viewed by using the Page Up and Page Down keys.

Description File Enquiry

2/STINE

This procedure enables the display of details from the Descriptions File. The screens are the same as those used for maintenance except updating is not allowed:

Descriptions File - Select ID.

Descriptions File - Low Level codes.

Descriptions File Enquiry Screen

This screen is displayed when you select the descriptions File Enquiry option.

It displays the Description ID's for selection.

06-30		SF		MW		KS IM II KENB20A PET178S2	

Fields:

Description ID

Enter the selected ID.

Low Level Code

If the details of a single low level code are to be displayed it should be entered. Leave this code blank if you wish to display the description of the major type.

Roll keys can be used to page up and down the displayed Description IDs.

To display all low level codes for a major code, You enter the Description ID of the major code and press **F15=Lower Level Details**. This will display a screen with a full list of low level codes.

Functions:

F15

Displays the list of low level codes for the selected ID.

Product/Stockroom Enquiry

1... **2...** 3/STINE

This is a multi-function enquiry intended to display all of the data from the product/style master and the stockroom balance. Entry can be at the level of static data for the style, a summary of the company stock position for the style or the individual stockroom balances. From a stockroom both batch and FIFO cost records can be displayed where this level of detail is supported.

Product/Stockroom Enquiry Selection Screen

This screen is displayed when you select the Product/Stockroom Enquiry.

It enables the selection of the style for enquiry, and the required level of entry.

Product/Stockroom Enquiry Stockroom Screen

 This screen is displayed if a product code and stockroom are entered on the selection screen.

It displays stockroom information under the following headings:

- Stock balances in issue units.
- Usage and stock management details.
- Costing and valuation.
- Preferred suppliers.
- Units of measure.
- Action dates.
- Standard bin locations.

All the balances displayed are in the issue units of the product/stockroom. The value of the stock is at the method selected for the style and this is indicated on the screen.

```

A list of lots is displayed showing lot balance information including reserved quantity information.

Fields:

Sel

The FIFO records for a lot may be displayed by selecting the required lot (this is done by entering a 1 alongside it).

Product/Stockroom Enquiry FIFO Details

This procedure is used to display the opening and current position of FIFO batches for a product/stockroom. Both date and time are displayed. The list of batches are displayed.

Product/Stockroom Enquiry Lot/FIFO Details

As FIFO costing is managed at lot level, if both are defined, this procedure is used to display the current FIFO records for a lot. This is the same as the standard FIFO display, except that the selected lot number is displayed as well as the product number and stockroom.

Stock Movements Enquiry

4/STINE

This procedure enables the display of stock movements for a product either in summary or detailed form. Other selection criteria are provided to restrict the number of movements displayed.

Inventory Movements Enquiry Screen 1

This screen is displayed when you select the Inventory Movements Enquiry option.

It enables the entry of the selection criteria for the stock movements to be displayed. The top of the screen allows entry of the selection criteria and the lower is a list of allowed movement types.

```
IN019          ST - JBA System Test Company      User GBJBARW2      9/11/95

05-21  SF  MW  KS  IM  II  KENB20A  PET178S2
```

Enter the following details:

Fields:

Product Code

The style for which the enquiry is to be made. The movement enquiry is always for a particular style, this field is therefore mandatory.

If the colour and size/fitting codes are known then these can be entered. If only the style part of the code is known when you press **Enter** a matrix screen is displayed for selection of colour/size/fitting (multiple entries are possible).

The following selection criteria can also be specified to reduce the scope of the subsequent display:

Stockroom

Select a stockroom or leave the field blank for all stockrooms.

Lot Number

Select a lot or leave the field blank for all lots.

From Date/To Date

Specify a range of dates or leave the field blank for all dates.

Movement Type

Specify a particular movement type or leave the field blank for all.

Summary Detail

Enter 1 to select a summary list with many movements on one screen, or 2 for a detailed enquiry with one movement per screen.

Press **Enter** to confirm the selections and display the enquiry.

Inventory Movements Enquiry Screen 2

This screen displays a list of the selected movements in a summary form - one line per movement.

A list of the selected movements is displayed. The most recent is displayed first. Roll keys may be used to page up and down.

A movement may be selected for detailed enquiry by entering a 1 against it in the list.

Inventory Movements Enquiry Screen 3

The screen displays the full details of an individual stock movement.

There are three groups of data:

- Identification of the movement: style, stockroom, references and date
- Movement quantity, the resulting balance after the movement was recorded, and the movement value
- Further control information: Lot number, third party (supplier, customer, etc.), date, time, terminal and user.

All Stockrooms For A Product Enquiry

5/STINE

This screen is displayed when you select the All Stockrooms For a Product Enquiry option.

The screen displays the disposition of the stock of a style throughout the company at summary level. It then provides access to the standard stockroom enquiry. A standard style selection is provided, prior to the display of the All Stockrooms For A Product Enquiry Screen for the selected style. The summary balance data is displayed for each stockroom where the part is stocked.

Press **Enter** to display the following carton details:

- Selling price of carton and piece.
- The default price list defined to descriptions is used - major type MISC and code of PLST, the price list code is entered in the description field.
- Cost and margin as a value or percentage is shown if they flag on the carton profile is set.
- Stock for carton, pieces and loose pieces (no longer stocked in a carton) are displayed.
- Pieces per carton and a description of the size mask associated with the pieces within the carton.

You can press **Enter** to show the breakdown of pieces within the carton (there may be many sets within a single carton, this set is often the ratio of pieces at the lowest level).

Functions:

F14

Alternative search. Shows alternative styles.

F15

Text. Shows text associated with the carton.

F17

Stock Available. Stock availability enquiry will be displayed for the carton.

F18

Loose Stock. Shows the available stock of loose pieces within the matrix.

F19

Change Warehouse. Allows you to change the warehouse which is the subject of the enquiry. The default is the sourcing warehouse defined against the style. Within the window only warehouses stocking the carton may be selected. A function key allows either available or free to sell stock to be displayed.

Colour Type Master File Enquiry

10/STINE

This option allows you to enquire on colour types and display the list of colours attached to a particular colour type.

Colour types are a series of colour codes which are linked together.

Colour Type Master File Enquiry Screen 1

The initial screen is displayed when you select the Colour Type Master File option.

Fields:

Colour Type Code

This allows you to enter a colour type code, to enquire on a specific colour type. A prompt facility is available.

Press **Enter** when you have selected a colour type code to display the detail screen.

Colour Type Master File Enquiry Screen 2

This screen is displayed when you press **Enter** on the initial screen after selecting a colour type code.

The screen displays the list of colours attached to the colour type code selected on the initial screen.
