Chapter 6

Inventory Reports

Scope Of Reports

/STINR

All of the functions described are accessed from the Reports option from within Inventory. The reports covered are concerned with:

- Status.
- Audit.
- Valuation.

Status reports obviously apply to the current disposition of stock and to the movements which brought about the current position.

The Audit function reports output before and after images of the data. These are only printed when requested, and they output all changes since the report was last sent to print. If sales orders that are attached to PO or WO are changed in item maintenance and the amendment affects purchase/works orders, the details appear on an item audit report which can be printed off.

Both the stock holding and movements can be valued.

Part Stockroom Report

**1/STINR**

This screen is displayed when you select the Part Stockroom Report option.

This report produces a hard copy listing of the parts and stockroom balances.

IN056		ST - JBA System Test Company		USER GBJBARW2		9/11/95

Fields:

Part Summary/Detail

Enter 1 for the report to show summarised information for a part; otherwise enter 2 to show detailed information.

Stockroom Summary/Detail

Enter 1 for the report to show summarised information for a stockroom; otherwise enter 2 to show detailed information.

You may specify the products to be printed by one of the following ranges:

Stockroom Code

Enter the code for the stockroom required to figure in the report.

Product Code

Specify the product or product range for which the report is to be printed.

Product Group Major/Minor

Specify the Product group or range of Product groups for which the report is to be printed.

Product Type

Specify the product type or range of product types for which the report is to be printed.

Product Class

Specify the product class or range of product classes for which the report is to be printed.

Press **Enter** to run the report

Part Audit Log

2/STINR

This screen is displayed when the Part Audit Log option is selected.

This report produces a hard copy print of all the changes made to the parts file since the report was last run. Normally the report would be run as part of a day or weekend run.

This report is submitted straight from the menu.

Stockroom Audit Log

3/STINR

This report produces a hard copy print of all changes made to the part/stockroom file since the report was last produced. Normally the report would be run as part of a day or weekend run.

This report is run straight from the menu.

Movements Audit Trail

1...
2...

4/STINR

This report provides a hard copy print of all movements that have taken place since the report was last run. Normally the report would be run as part of a day or weekend run.

- Movement value by transaction type, for each stockroom.
- This option is run straight from the menu.

Stock Movements Valuation Report

5/STINR

This report lists the stock availability of an item, or range of items over a period of time, taking into account both demand and supply orders. Two running totals of stock availability are calculated; the first allows for demand orders only, the second for both demand and supply (in other words a worst and best case).

The report lists opening stock levels, movements and closing levels for all items that have moved during the period. This is the report which you will be prompted to run when you request a period end update.

Select the option Stock movements valuation option to display this screen.

The report runs as part of the month end processing, but may be run at anytime.

Fields:

Item From . . . To

Enter a range of items or leave blank to select all items.

Stockroom From . . . To

Enter a range of stockrooms or leave blank to include all stockrooms.

Allocations

Enter a 1 if you wish to print allocations, otherwise enter 0.

Reservations

Enter 1 to print all reservations against the selected items in the above stockroom, otherwise enter 0.

When you press **Enter** the report will be submitted.

The selections available are:

Range Of

Stockroom and Product Codes or Product Group Major/Minor or Product Type or Product Class.

Stock Valuation

6/STINR

This procedure values the physical and in transit stock of the requested parts/products or stockrooms.

The report lists opening stock levels, movements and closing levels for all items that have moved during the period. The report is normally run as part of the month end processing, but may be run at anytime.

Selections are available by:

Range Of

Stockroom and Product Codes or Product Group Major/Minor or Product Type or Product Class.

Stock Movements Report

7/STINR

This program provides a hard copy print of a selection of stock movements in a number of different sequences.

Select the option Stock Movements option to display this screen.

The following selections are available:

Stockroom

Enter up to two alphanumeric characters to specify the stockroom for which the report is to be produced. To print all the stockrooms leave this field blank.

Product Code

Enter up to fifteen alphanumeric characters to specify the product/part number to be included in the report. To print all the products leave the field blank.

Product Group Major And Minor

Enter the product group major and product group minor for which the report is required. If all product groups are required on the report, leave this field blank.

Reference Date

You have to specify a reference date range for the report. To print movements for a particular reference date, enter a single date. Leave the field blank if all reference dates are required.

Movement Date

Enter up to two valid dates to specify the movements that are to be included in the report. Any movements made between the dates specified will be printed. To print movements for a particular day enter just one date. To print all movements both entries should be blank.

Movement Type

Enter a one character code from the displayed list to specify the movement type to print, or leave the field blank to print all of the movement types.

Week Number

Enter four numeric characters in the format YYWW, this is to specify the week number of the movements to be printed. Leave the field blank if no week number selection is required. If this field is blank all movements that satisfy the previous selection criteria are printed.

Period Number

Enter four numeric characters in the format YYPP, this is to specify the period number of the movements to be printed. Leave the field blank if no period number is required. If this field is blank all movements that satisfy the previous selection criteria are printed.

Press **Enter**, and then **F8** to continue. The Request Stock Movements Report Selection Screen is displayed:
