Chapter 9

Packaging Requirements

Introduction To Packaging Requirements

Packaging Requirements provides a complete set of facilities for analysing and reporting of packaging information. This information will help you to produce the packaging statistics that need to be submitted to the appropriate authority. You use the information produced to complete the standard documentation provided by the authorities.

You use Packaging Requirements to enter information about how much of each type of packaging is used when a product is shipped to a domestic customer over a specified period.

Setting Up Packaging Requirements

Before you can track the packaging used you need to set up the following:

For each inventory company you need to:

- Set the Packaging Reporting Flag on the Maintain Company Profile Screen.
- Set up the Packaging Reporting Country.
- Set the Packaging Reporting Flag on each style you need to track the packaging details.

For each Packaging Reporting Country you need to set up:

- Packaging categories.
- Packaging codes.
- Average packaging details per despatch.
- Default responsibilities.

You also need to set up the packaging details for each style that you are tracking.

Country Details Maintenance

1/STINK

You use this procedure to maintain the data and reporting parameters for each country where a packaging report will be submitted. The information you can enter includes:

- Packaging Responsibilities. To apportion the responsibility for each member of the supply chain.
- Default Responsibilities. To define percentage responsibilities when you are tracking responsibilities.

Note: If track responsibilities is not set, the responsibilities can be defined but are not effective until Track Responsibilities Processing is switched on.

- Packaging Categories. To define summary groups for the packaging used so totals can be provided by surface area, weight, volume or any other classification.
- Packaging Codes. These could relate to packaging materials, for example, glass, cardboard, wood, or they could relate to individual packaging, for example, glass bottle (25cl), glass bottle (33cl).

Note: Before you set up any of the reporting parameters, you must set the Packing Reporting Flag on the Maintain Company Profile Screen.

Maintain Packaging Reporting Countries Selection Screen

Select Country Details (Maintenance).

Use this window to select the Packaging Reporting Country you want to maintain.

Fields:

Untitled

Enter one of the following:

2 - Amend. Enter this option to alter the details for the reporting country.

4 - Delete. Enter this option to delete the details for the country.

Functions:

F10

Add Country. Use this function to define a new reporting country for the current inventory company.

F19

Position to. Use this function to position the screen display to the country selected.

Select **F3=Exit** to leave the screen without making any changes.

Maintain Packaging Reporting Country Screen (Option 2)

To display this screen enter 2 in the untitled field on the Maintain Packaging Reporting Countries Selection Screen.

Use this screen to enter new details and change existing details for the selected packaging reporting country.

IN345	ST - Style Test & QA Company	User GBJBARW2	25/02/98 13:08:09
Maintain Packaging Reporting Country			
Country.....	GB	Great Britain

F13=Responsibilities F14=Packaging Codes F24=More keys			
7-31	SA	MW	KS CL IM DM II STUD140 KB PET179S1

Fields:

Country

Enter the country code.

When you are amending country details, this field is for your information only and cannot be amended.

Note: You can only set up one set off packaging reporting details for each country.

Reporting Frequency

Enter how often the report needs to be produced:

1 - Monthly.

2 - Quarterly.

The default value is monthly.

Reporting Format

Enter a valid report format or leave this field blank to use the standard report format.

Note: You can define a report format using the

descriptions file code GDFT.

Track Responsibilities

Enter one of the following:

0 - If you have total responsibility for the packaging.

1 - To track responsibilities throughout the supply chain.

Note: If you are using the German Duales report format, you must set the Track Responsibilities to 0.

Calendar Code

Enter the code for the calendar used by this reporting country.

Current Year

Enter the current year. This defaults to the current year for the inventory company.

When you are amending the country details this field is for information only.

Current Period

Enter the current period. This defaults to the first period of the current year.

When you are amending the country details this field is for information only.

Reporting Currency

You must enter a reporting currency that is valid within General Ledger.

If you are using the World Trade module, this field defaults to the reporting currency specified for this country.

Reporting VAT Code

You must enter a valid VAT Code.

Reporting Address

Enter the address where your packaging data needs to be submitted. This field is mandatory.

Target Recovery and Target Recycling

Enter the Target Recovery and Target Recycling Percentage.

These fields are used when tracking responsibilities to compound with the derived responsibility. For example, if the amount of packaging you must recover is 25 kg, if Recovery is set to 40% and recycling is set to 8%, you must recover 10 kg of packaging and recycle 2 kg of tin in this period.

Functions:

F13

Responsibilities. Use this function to maintain the packaging responsibilities incurred by the members of the supply chain.

Note: Responsibilities are only effective if you have set Track Responsibilities to 1.

F14

Packaging codes. Use this function to define the packaging codes applicable in this country.

F15

Average Packaging. Use this function to maintain the average packaging details to be included on each despatch line.

F16

Packaging categories. Use this function to maintain the packaging categories used by the countries to whom the report will be submitted.

Tip: If all the functions are not available, select **F8=Update** to save the information. The rest of the functions will then become available.

Select **F8=Update** to validate and save the information entered. Then select **F12=Previous** to return to the Maintain Packaging Reporting Country Selection Screen.

Maintain Responsibilities Window (F13)

To display this window select
F13=Responsibilities on the Maintain
Packaging Reporting Country Screen.

Use this window to change the packaging responsibilities for the members of the supply chain.

Select **F8=Update** to validate and save the information. Then select **F12=Previous** to return to the Maintain Packaging Reporting Country Selection Screen.

Style Details Maintenance

2/STINK

Use this procedure to define country specific information about the packaging required for each style. You can condition the packaging definition for a style dependent on the quantity despatched. For example:

Beer:

Per litre = 50 grams aluminium.

Per 12 litres = 50 grams aluminium + 2 grams plastic + 4 grams cardboard.

Per 100 litres = 50 grams aluminium + 2 grams plastic + 4 grams cardboard + 1 kg wood pallet.

Note: Before you can define the packaging information you need to set the Packaging Reporting Flag in the Style Maintenance Screen.

Country Style Packing Details Selection Screen

Select Style Details (Maintenance).

Use this screen to select the style whose packing details you want to maintain.

To display the Override Responsibilities Window, enter 1 in the Untitled field on the Selection Of Customer To Be Maintained Screen.

Sales Channel Overrides

4/STINK

Use this procedure to define packaging responsibilities for a sales channel when they vary from the default for a particular country.

Note: Sales Channel responsibility overrides are used regardless of the responsibility settings for Country and Style but are overridden by any responsibility overrides defined for the customer.

Sales Channel Responsibility Overrides Screen

Select Sales Channel Overrides.

Use this screen to select the sales channel for which you want to enter responsibility overrides.

Note: If the company does not have sales channels defined then you cannot define Sales Channel Responsibilities overrides.
