Chapter 3

Enquiries

Enquiry Categories

The enquiries in the Sales Order Processing application are designed to provide rapid and complete access to the data contained within the system and to display it in an efficient manner. An enquiry that enables you to see the reserved quantities at SKU level on the matrix is accessible from sales, purchase and works order and requisitions enquiries, order entry and amend, purchase order line amend, receipt and transfer and works order booking. Enquiries can be grouped into three main areas:

Reference Details

In general the same formats as the maintenance procedure are used. This enables them to be made available to those who do not have authority to use maintenance:

Descriptions and standard reference data.

Customer.

Product details - this is extended into the full Inventory style status.

Depot Profile.

Price Discount Profiles.

Price Lists.

Discount lists.

Stock-Status

Stock position.

Stock availability.

Stock matrix.

Order Bank

Order details.

Orders by customer and item.

Despatch notes raised but not invoiced.

Invoice details.

Invoices by customer and order number.

Customer Search

When the Sales Order Processing company is set up it is possible to define certain fields from the customer record as those to be used to search for customers. The customer name is always used, but it can be used in conjunction with two other fields. The fields may be single pieces of data like telephone numbers or a string of words like address lines. All text type fields like Names and Addresses are broken down into words and these words are entered into an index. A word is a string of two or more characters without an intervening space. Articles, conjunctions and words like Ltd and plc are discarded. Searches can then be made using the index. Only a partial name match is necessary, for example:

SM will find all SMITHS and SMALLS

The search will list all customers which satisfy the entered criteria. If no criteria is entered when the search is invoked, all customers will be listed in account code sequence.

The search may be invoked whenever 'Customer'...? appears.

To invoke the search enter a '?' in the customer number and press **F4=Prompt** or **Enter**. This results in the following window being displayed:

Up to three search criteria can be used to make the selection as specific as possible. Part of the name would normally be entered because the name is known. If anything is known concerning either of the other criteria this should be entered. The customer selected will satisfy the tests:

Customer name and criteria two.

OR

Customer name and criteria three.

If no selection criteria are entered all customers will be selected and displayed in account sequence.

Normally the selection can be made sufficiently specific in order that only a few customers are displayed. If, however, many accounts have been selected the window may be expanded to fill the whole screen, by the use of function key **F13**.

Whole Order

1/STOEE

The purpose of this enquiry is to provide a multi-level display of order details. From the display of the details of the whole order a more detailed inspection of both order header and order line information is allowed.

Whole Order Enquiry Screen 1

Select Whole Order on the Enquiry menu.

This function enables the selection of the order for display. There are two ways in which to do this; either the sales order number or the customer code and the order reference may be entered on the screen.

Fields:

Order

Enter the sales order number of the required order.

OR

Customer

This must be entered in conjunction with the customer order reference. If this method is to be used, both the Account Code and the delivery sequence number must be entered. A prompt is available to select them.

When you press **Enter** the Order Summary screen is displayed.

Whole Order Enquiry Order Summary Screen

When you press **Enter** on the initial screen the summary screen is displayed. It displays a summary of the order details.

The top of the screen displays order header information; the lower screen displays a list of order lines. Roll keys may be used to page up and down through the order.

If the order is suspended, a reverse image message is displayed at the top of the screen giving the reason for the suspension.

This is followed by the three key dates from the order header:

- Customer's order date.
- The date the order was entered into the system.
- The delivery due date for the order.

The order value information is then displayed in the prime currency of the account and the final header information is dependent on whether the invoice price will be price ruling at order or despatch. A list of order lines is then displayed.

Fields:

Untitled

Entering numbers 1-10 beside a specific order line displays the colour/size/fit matrix for the style and quantity information.

1 - Select. Select a particular colour/size/fit combination for review. Insert 1 against the appropriate item and press **Enter** to display order line details, including pricing, discounts and quantities (see the order line detail screen).

All other selections will display the matrix and relevant quantities for each colour and size.

2 - Ordered. Order line quantity ordered.

3 - Outstanding Order. The line quantity still outstanding (open).

4 - Allocation. Order line quantity currently allocated.

5 - Picked. Order line quantity with an On Pick status.

6 - Packed. Order line quantity with an On Pack status.

7 - Despatched. Order line quantity shipped.

8 - Text. Displays the external Windows associated with this order line.

9 - Prices. Displays the individual colour/size/fit prices associated with the style.

10 - Reservations. Displays the date the order was reserved.

Ln

The line number of the item on the order.

Description

Product description.

Order Qty

The total quantity ordered for a particular item on this order line.

Quantity

This is the quantity last actioned.

S

The line status code S defines what the quantity is:

A - allocated quantity.

C - cancelled.

D - despatched quantity.

I - confirmed despatch quantity.

O - quantity outstanding.

P - picked or packed quantity.

Due Date (See F14)

Due date. The required delivery date for the order line item.

Can date. Cancellation date, if applicable.

DNSB. Do-Not-Ship-Before date.

Orig Rqst. Original request date.

Orig Dlv. Original delivery date.

Inv. No

The invoice number of the most recent despatch.

Typ

This displays the order type against each order line. The types shown will be:

DD - Direct Delivery.

BB - Back-to-Back purchase orders.

WO - Back-to-Back works orders.

RS - Reservations.

Functions:

F13

Further Details. Further details for the whole order (Order defaults screen).

F14

Dates. The F14 (Dates) facility displays date variables in the following order:

Due date. The date the delivery is required.

Can date. Cancellation date, if applicable.

DNSB. Do-Not-Ship-Before date.

Orig Rqst. Original request date.

Orig Dlv. Original delivery date.

F21

Internal text for the order.

F22

External text for the order.

Whole Order Enquiry Screen 3

This screen is displayed by pressing the **F13=Further detail** on the Order Summary Screen. It displays the details used in processing the order.

The top part of the screen is the same as the summary, but the bottom contains the defaults used for processing the order as well as additional order data.

Three main columns of data are displayed:

### Fields:

#### Price/Discount

##### **Base Line Value**

The value of the order line in the base currency of the system.

##### **Prime Line Value**

The value of the order line in the currency of the order.

##### **Price**

The unit price of the product (at SKU level if appropriate).

##### **Entered Discount**

The discount percentage if one was entered as an override.

##### **Line Discount**

The order line discount derived from the discount list.

##### **Order Discount**

The whole order discount derived from the discount list.

**Disc. Value**

The total discount value for the order line.

**Quantity**

**Order**

The quantity ordered for this line.

**Outstanding**

The quantity still to be satisfied.

**Desp**

Despatched. The quantity despatched so far.

**Alloc**

Allocation. The quantity currently allocated, but not yet included on a picking instruction.

**Picked**

The quantity currently on pick.

*Note: Ordered - Outstanding - Despatched -  
Allocated = Quantity on Pick*

**Packed**

The quantity currently on pack.

**Line Details**

**Delivery**

Delivery address sequence code of customer for this order line.

**Warehouse**

The warehouse from which despatches will be made.

**Priority**

The current priority of the order line.

**Price List**

The price list used for pricing the order line.

**Priced At**

Price ruling at time of order or despatch.

**Discount List**

The discount list used for discounting the line.

**Line Pick %**

The current pick percentage for the order line.

**B/O Line Pick %**

Back Orders Line Pick Percentage. The percentage of order line items for delivery for which there is no stock.

**Functions:**

**F13**

Display additional details.

**F15**

Restart. Return to initial select screen.

**F16**

Display despatch details window.

## Despatch Details Window (F16)

The despatch details notes may be displayed by pressing **F16=Despatch Dets** on the Order Summary screen. Details of despatch notes are displayed in a window.

### Fields:

#### Customer Reference

The customers reference number entered at the time of the order.

#### Product Code

Style number.

#### Date Ordered

The date the order line was entered.

#### Quantity Ordered

The quantity on order for this order line.

#### Quantity Despatched

The quantity shipped so far for this order line.

#### Typ

This displays the order type against each order line. The types shown will be:

DD - Direct Delivery

BB - Back-to-Back purchase orders

WO - Back-to-Back works orders

RS - Reservations

## **Sel**

Placing **1-10** beside a specific order line displays the colour/size/fit matrix for the style and quantity information requested.

### **1 - Select**

Select. Allows the selection of a particular colour/size/fit combination for review. Placing a **1** in the appropriate column and pressing **Enter** displays order line details, including pricing, discounts and quantities (see the Order Line Detail screen).

All other selections will display the matrix and relevant quantities for each colour size and fit.

### **2 - Ordered**

Order line quantity ordered.

### **3 - O/S**

Orders Outstanding. Order line quantity still outstanding (open).

### **4 - Alloc**

Allocation. Order line quantity currently allocated.

### **5 - Pick**

Order line quantity with an 'on pick' status.

### **6 - Pack**

Order line quantity with an 'on pack' status.

### **7 - Desp**

Order line quantity shipped.

### **8 - Text**

Displays the external text window associated with this order line.

### **9 - Prices**

Displays the individual colour/size/fit prices associated with the style.

### **10 - Reservations**

Displays the date the order was reserved.

## **Functions:**

### **F13**

Change the level of the detail, to add sales order number and line.

If you press **F13=Change Level Of Detail** the sales order number and line number are displayed instead of the customer reference.

## Orders By Customer Screen 3

This screen displays the order line details including prices, discounts and quantities and is displayed by entering a 1 against the order line.

The required style is then selected from within the matrix by entering a 1.

Tip: See the section on Whole Order Enquiry for a detailed description of the screens involved.

# Orders By Customer And Style Enquiry

## 3/STOEE

The purpose of this enquiry is to provide a list of all orders, by customer, either for all styles or for those which contain a specific requested style. A choice is given to include completed or open orders.

## Orders By Customer And Style Selection Screen

Select By Customer And Style on the Orders area of the Enquiry menu.

This screen enables the selection of orders for display.

### Fields:

#### Customer Number

Enter the customer number and delivery sequence code.

#### Product Code

Enter the product code, or leave blank for all styles.

#### Customer Reference

Enter the customer reference code.

#### Status Of Orders

0 - Exclude completed orders.

1 - Include completed orders.

2 - All orders.

#### Order Sequence

Display order number and order lines in ascending order, by inputting 1, or a descending order, by inputting 2. The default value is 1.

#### Range Of Dates

Enter selected dates to display date-specific orders. If Range Of Dates is left blank all orders will be called up.

Press **Enter** to display the Order Summary screen.

## Orders By Customer And Style Summary Screen

Press **Enter** on the selection screen to display the Order Summary screen.

The screen displays a summary of all order lines containing the requested style, (or all styles if none selected for the requested customer). This screen lists the customer reference number, style code, date ordered, quantity ordered, and quantity despatched for all orders selected.

Details of the order lines displayed may be obtained by placing 1-8 next to the order line of interest. The order line selection options will then reveal specific information about the order line. The valid options are shown on the right of the screen.

### Fields:

Placing 1-8 beside a specific order line displays the colour/size/fit matrix for the style and quantity information requested.

#### 1 - Select

Allows the selection of a particular colour/size/fit combination for review. Placing a **1** in the appropriate column and pressing **Enter** displays order line details, including pricing, discounts and quantities (see the order line detail screen). All other selections will display the matrix and relevant quantities for each colour size and fit.

#### 2 - Ordered

Order line quantity ordered.

#### 3 - O/S

Order line quantity still outstanding (open).

**4 - Alloc**

Order line quantity currently allocated.

**5 - Picked**

Order line quantity with an on pick status.

**6 - Packed**

Order line quantity with an on pack status.

**7 - Desp**

Order line quantity with a shipped status.

**8 - Text**

Displays text associated with this order.

**9 - Prices**

Displays the individual colour/size/fit price associated with the style.

**10. Reservations**

Displays the date the order was reserved.

**Functions:**

**F13**

Change level of detail - this option adds sales order number, style code description, and order line number information to the order line displayed.

## Orders By Customer And Style Order Line Screen

This screen displays the order line details, including prices, discounts, and quantities and is displayed by entering a 1 against the order line. The required colour/size/fit is then selected from within the matrix by entering a 1.

See the section on Whole Order Enquiry for a more detailed description of the process screens involved.

# Order By Product Enquiry

## 4/STOEE

The purpose of this enquiry is to display all order lines, together with the stock position for a selected style.

## Orders By Product Selection Screen

Select By Product on the Order area of the Enquiry menu.

This screen enables the style to be selected. A product code has to be entered. The standard style searches are available.

When the **Enter** key is pressed, the order lines for the selected item are displayed.

## Orders By Product List Screen

This screen is displayed when you select an order line on the initial screen a list of all the order lines for the style. The list is sequenced by order number.

Four control fields for the item are displayed to monitor stock levels across all stockrooms.

### Fields:

#### Physical Stock

Sum of physical stock for all stockroom balances.

#### Free Stock

Sum of free stock for all stockrooms.

#### Order Qty

Order quantity. Sum of order quantities for live orders.

#### Despatch Qty

Despatch quantity. Sum of despatch quantities for live orders.

This is followed by a list of the order lines. The following data is displayed:

#### Order

The sales order number.

#### Order Reference

The customers order reference.

#### Ln

Line. The order line number.

**Customer**

The customer code and delivery address sequence number.

**Ord Date**

Order date. The order date.

**Ord Qty**

Order quantity. The quantity on order.

**Des Qty**

Despatch quantity. The quantity despatched for the order.

A line may be selected for detailed display by entering the character 1 at the left hand end of the line.

**Typ**

This displays the order type against each order line. The types shown will be:

DD - Direct Delivery.

BB - Back-to-Back purchase orders.

WO - Back-to-Back works orders.

RS - Reservations .

**Fields:****Sel**

Select. Placing 1-9 beside a specific order line displays the colour/size/fit matrix for the style and quantity information requested (by colour, by size).

**1 - Select**

Allows the selection of a particular colour/size/fit combination for review. Enter a **1** in the appropriate column and press **Enter** to display order line details, including pricing, discounts and quantities (see the order line detail screen).

All other selections will display the matrix and relevant quantities for each colour and size.

**2 - Ordered**

Order line quantity ordered.

**3 - O/S**

Outstanding orders. Order line quantity still outstanding (open).

**4 - Alloc**

Allocation. Order line quantity currently allocated.

**5 - Pick**

Order line quantity with an 'on pick' status

**6 - Pack**

Order line quantity with an 'on pack' status.

**7 - Desp**

Despatch. Order line quantity shipped.

**8 - Text**

Display text associated with this order

**9 - Prices**

Displays the individual colour/size/fit prices associated with a style.

**10 - Reservations**

Displays the date the order was reserved.

## Orders By Product Line Detail Screen

This screen displays the order line details including prices, discounts and quantities and is displayed by entering a 1 against the order line.

Select the required colour/size/fit (style) by entering a 1 within the matrix .

Tip: See the section on Whole Order Enquiry for a detailed description of the screens involved.

# Order Cross Reference

## 5/STOEE

The purpose of this enquiry is to display all orders for a customer for a given period, cross referencing the customer's own order reference number and the sales order number. If an order is selected the whole order enquiry facilities are available.

# Order Cross Reference Selection Screen

 Select Cross Reference on the Enquiry menu.

This screen enables you to enter the customer numbers or order date you want to enquire on.

Order Cross-Reference

Customer number.....?.. \_\_\_\_\_

Orders entered between.. 311095 (DDMMYY)  
and..... 311095 (DDMMYY)

Omit the delivery sequence number to review  
all orders for the given customer number.

F3=Exit F4=Prompt

05-27  MW KS IM II KENB20A PET178S2

**Fields:**

**Customer Number**

Enter the customers code. If the delivery sequence is omitted, all orders for all sites are displayed.

**Orders Between**

The date range for the orders.

 Press **Enter** to display the Detail screen showing a two-column display of orders and customer reference numbers.

## Order Cross Reference Detail Screen

This screen is displayed when you press **Enter** on the selection screen.

The list shows all the orders between the nominated dates.

### Fields:

#### Select

If an order is selected by entering 1 alongside the order, the whole order enquiry is used to display the information. Control is returned to the list by pressing Enter on the initial screen of the whole order enquiry.

### Functions:

#### F15

Restart at selection.

# Invoice By Order Number Enquiry

## 6/STOEE

This procedure displays details of invoices from an order number and then provides access to the full invoice enquiry.

## Invoice Enquiry By Order Selection Screen

Select Invoice By Order Number on the Enquiry menu.

This screen enables the selection of the order for which invoices are to be displayed. There are two ways to select the order - either by the sales order number or the customer code and the order reference.

```
0E225 ST - JBA System Test Company USER GBJBARW2 31/10/95
 15:05:22
Invoice Enquiry By Order
Order.. 5000004 Cust No..?.. MLR 000 Order ref..
F3=Exit F4=Prompt
05-61 SF MW KS IM II KENB20A PET178S2
```

### Fields:

#### Order

The sales order number of the required order.

OR

#### Cust No

Customer number. This must be entered in conjunction with the customer's order reference. If this method is to be used, both the Account Code and the delivery sequence number must be entered. A prompt is available to select the customer.

#### Order Ref

Order reference. Sales order reference.

When you press **Enter** key, invoices for the selected order are displayed.

## Invoice By Order Number Enquiry List Screen

When you press **Enter**, invoices for the selected order are listed.

This screen is used to list the invoices issued against an order. At the top of the screen, the order number, customer number and order reference are shown. To select an individual order for enquiry, enter a 1 against invoice numbers, when the invoice line details will be displayed. This is followed by a list of invoices and their values.

## Further Detail Screen (F13)

This screen is used to display details of the selected invoice. It is displayed by pressing **F13=Further Detail** on the List Screen.

At the top of the screen the invoice number, order number, customer invoice and delivery address, price and discount lists, reason code, discount code and despatch method are displayed.

The following fields are displayed in the body of the form.

### Fields:

#### Dsp

Despatch. The despatch note sequence number for which the invoice was issued.

#### Description

The style description.

#### Qty

Quantity. The invoiced quantity of the style.

#### Price

The unit price of the style.

#### Nett

The nett extension of price x quantity, including any discounts.  
(That is, the total invoice line amount for that style).

#### Inv. No.

Invoice number. The invoice number associated with this order.

#### Des Date

Despatch date. The ship (despatch) date.

#### Sel

Select. Further information may be displayed about the invoice lines by entering a 1 or 2 against the line. Selecting an invoice line with a 1 displays the invoice line details screen. A 2 displays the colour/size/fit matrix and the quantity breakdown of the requested style.

### Functions:

#### F13

Further detail of the invoice.

#### F15

Restart (return to selection screen).

**F18**

Alternate between base and prime values.

**F19**

Charges window.

**F21**

Internal text.

**F22**

External text.

## Invoice line Detail Screen (Option 1)

Selecting an invoice line with a 1 on the Invoice Detail screen (**F13=Further Details**) displays the full details of an invoice line.

### Fields:

#### Invoice

The invoice number.

#### Despatch Note

Sales order number relating to this invoice.

#### Cust. No.

Customer number. The customer account number and delivery sequence code.

#### Order Ref

Order reference. The customer order reference number.

#### Order Line

The sales order line number.

#### Product Code

The style code and description.

#### Invoiced

The invoice date and VAT point date.

#### Despatched

Date the shipment was recorded as taking place.

**Picking Note**

The despatch note sequence number.

**Statement**

The account code for the statement account in Accounts Receivable. This is the account to which the invoice was posted.

**Line Discount**

Line discount percentage.

**Order Discount**

Whole order discount percentage.

**Unit Price**

Unit price of the product.

**Quantity**

Quantity invoiced.

**Warehouse**

Shipping warehouse.

**Transaction**

The allocation priority.

**Discount Code**

The cash settlement discount code.

**Ent. Discount**

The discount entered by the operator when the order was recorded on the system.

**Value**

The goods value of the line, including all discounts.

**Price List**

The price list used for the line.

**Discount List**

The discount list used for the line.

**VAT Code**

The code used to determine sales VAT date.

**VAT Amount**

The sales VAT amount for the line.

**Gross**

The total of goods and VAT due for the line.

**Period**

The accounting period to which the invoice was posted.

**Functions:**

**F15**

Restart at the selection screen.

**F18**

Alternate between base and prime values.

## Matrix Window (Option 2)

Selecting an invoice line with a 2 displays the colour/size/fit matrix for the style listed on the invoice line. This screen displays the quantity of the style invoice broken down by specific colour, size and fit within the matrix.

### Functions:

#### F19/F20

These display additional size details to the left or right of the colour/size/fit matrix.

## Invoice By Invoice Number Enquiry

**7/STOEE**

This procedure displays the full details of an invoice. Selection may be made either by invoice number or picking note number.

## Invoice By Invoice Number Selection Screen

This screen is used to select the invoice to be displayed.

This selection may be by either the invoice number or the picking note number. If the picking note number is used both the order number and the despatch note sequence number must be entered.

Press **Enter** to display a summary of the requested invoice or credit note.

## Invoice By Invoice Number Summary Screen

This screen is displayed when you press **Enter** on the selection screen. It displays a summary of the invoice showing both invoice header and the invoice line information.

Further details for both can be displayed. The top of the screen displays the header information. This is followed by the ship to and invoice to addresses.

### Fields:

#### Price List

Price list for the order.

#### Disc List

Discount list for the order.

#### Reason

A reason code is required for all credit notes and summary invoices. If one is present for the document, it is displayed.

#### Discount

Cash discount code given on this invoice.

#### Desp Meth

Despatch method. The code for the despatch method recorded at the time of despatch.

For each invoice line:

#### Dsp

Despatch note sequence number of the despatch within this invoice.

**Description**

Product description.

**Qty**

Quantity despatched and invoiced.

**Price**

Unit price charged for the product. This is before discounts.

**Nett**

Nett is the extended value of the line, including any discounts.

**Des Date**

Despatch date of the product.

Further details of the invoice header including total invoice value may be displayed by pressing **F13=Further details** (see Invoice Header). The full details of an invoice line may be shown by entering 1 to select (see Invoice Line Detail). Selecting a line with a 2 displays the colour/size/fit matrix for the style and its associated quantity breakdown (see Invoice Line Matrix Detail). The chargeback number is also displayed below the name and address of the customer if selected on the initial screen.

**Functions:**

**F13**

Further details of the invoice header.

**F15**

Restart the enquiry at selection.

**F19**

Charges window.

**F21**

Internal order text.

**F22**

External order text.

## Invoice By Invoice Number Header Screen (F13)

Press **F13=Further Detail** on the Invoice Summary screen to display further information on the invoice header. If originally selected on the original screen the chargeback number is displayed below the customer name and address.

### Fields:

#### Goods Total

Total goods value of the invoice, including all discounts, plus any miscellaneous charges.

#### VAT Total

Total VAT on the invoice.

#### Invoice Total

Total of goods plus VAT total.

#### Charges Total

Total miscellaneous charges. To see a breakdown of these charges take function F19.

#### Discount Code

Cash settlement discount code, if applied.

#### Discount %

Cash discount percentage, if applied.

**Type**

The transaction type is either an invoice (IN) or a credit note (CR).

**Priced At**

1 - Priced at time of order.

2 - Priced at time of despatch.

**Print Flag**

P if the invoice has been printed and Accounts Receivable has been updated.

**Date Ordered**

Sales order date.

**Date Invoiced**

Invoice date.

**Period**

Accounting period to which this invoice was posted.

**Order No.**

Sales Order number.

**Customer No.**

Customer account number and delivery sequence code.

**Statement No.**

The account code for the statement account in Accounts Receivable. This is the account to which the invoice was posted.

**Invoice No.**

The account code for the invoice account. This is the account to which the invoice was sent.

**Miscellaneous Analysis Code**

If a miscellaneous analysis code has been entered against a credit note or sundry invoice it will be displayed with any associated information, e.g., 'No lines exist for this invoice' or 'Cash discount deducted from VAT'.

**Functions:**

**F13**

Payment details.

**F15**

Restart at the selection screen.

**F18**

Alternate between base and prime values.

**F19**

Charges window.

## Invoice By Invoice Number Line Detail Screen (Option 1)

Selecting an invoice line with a 1, from the Invoice Summary screen, presents the full details of the line.

The invoice and despatch note number are displayed at the top of the screen, along with the product code and description. The despatch date, invoice date, order reference, customer number, and statement account number are also displayed.

### Fields:

#### Line Disc

Line discount percentage.

#### Order Disc

Whole order discount percentage.

#### Unit Price

Unit price of the product.

#### Quantity

Quantity invoiced.

#### Warehouse

Shipping warehouse.

#### Transaction

Allocation priority.

#### Discount Code

Cash settlement discount code.

**Discount**

The discount value of the invoice line.

**Value**

The goods value of the line including all discounts.

**Price List**

The price list used for the line.

**Discount List**

The discount list used for the line.

**VAT Code**

The code used to determine the VAT rate.

**VAT Amount**

The VAT amount for the line.

**Gross**

The total of goods and VAT due for the line.

**Period**

The accounting year period to which the invoice was posted.

**Miscellaneous Analysis Code**

If a miscellaneous analysis code has been entered against a credit note or sundry invoice it will be displayed with any associated information, e.g., 'No lines exist for this invoice' or 'Cash discount deducted from VAT'.

**Functions:**

**F15**

Restart at the selection screen.

**F18**

Alternate between base and prime values.

## Select Colour(s) Window (Option 2)

Selecting an invoice line with a 2 displays the colour/size/fit matrix for the style listed on the invoice line. This screen displays the quantity of the style invoice broken down by specific colour, size and fit within the matrix.

### Fields:

#### Sel

Select. Enter 1 to select a variant.

#### Position To Sequence

Optionally, enter a sequence number at which to commence the display.

### Functions:

#### F19/F20

Displays the screen to the left or right of the colour/size/fit matrix to show additional sizes.

# Invoice By Customer Enquiry

## 8/STOEE

This procedure enables you to display details of invoices for a selected customer. A list of invoices is displayed showing the total values, date and accounting period. Invoices may then be selected for more detailed scrutiny in the same format as the Invoice by Invoice Number Enquiry.

The first two screens are unique to this enquiry:

- Invoice by Customer Enquiry Selection screen.
- Invoice by Customer Enquiry List screen.

The final four screens are the same as the Invoice by Invoice Number Enquiry.

- Invoice by Customer Enquiry Invoice Summary screen.
- Invoice by Customer Enquiry Invoice Header screen.
- Invoice by Customer Enquiry Invoice Line Detail screen.
- Invoice by Customer Enquiry Invoice Line Matrix Detail screen.

## Invoices By Customer Selection Screen

This screen enables the selection of the account for which invoices are to be displayed. This is achieved by entering a customer number.

The Customer account and delivery address sequence code is entered. If it is not known then standard customer search routines are provided. You may also enter the Chargeback/Debit note number for the enquiry.

Press **Enter** to display the invoices for the selected customer.

## Invoices By Customer List Screen

Press **Enter** on the initial screen to display the invoices for the selected customer.

This screen displays the invoices and credit notes raised for a customer. Credit notes are identified by the suffix CR. The invoices are listed one document on each line. The invoices are listed in invoice number sequence. If you entered a chargeback number on the selection screen, a list of credit notes will be displayed which relate to that charge back number only.

### Fields:

#### Invoice

The invoice or credit note number.

#### Value

The value of invoice lines and extra charges.

#### VAT

The total VAT value.

#### Total

The total of the invoice value plus VAT value.

#### Discount

A memo field to indicate the total value of discounts given on the invoice. This excludes any cash settlement discount.

#### Date

The date the invoice was raised.

**Period**

The accounting period in Accounts Receivable to which the invoice was posted.

**Select**

The full details of the invoice may be examined. They are selected by entering a 1 alongside the invoice. The screens and details are the same as the Invoice by Invoice Number Enquiry.

**Function:**

**F13**

Further detail. This displays a screen showing more detail for the selected customer.

# Stock By Product Enquiry

## 9/STOEE

This procedure displays an overview of the stock of a product in all stockrooms, or of all products in a selected stockroom.

## Stock Enquiry Screen 1

Select Stock By Product on the Enquiry menu.

This screen is used to select the product for which all stockrooms are to be displayed.

**Stk. Rm**

Stockroom. The stockroom or warehouse.

**Physical**

The stock on the shelf in that stockroom.

**Allocated**

The stock allocated to all types of sales orders.

**Picked**

The stock 'on pick' status at the present time.

**Available**

The stock available to allocate (free to sell ).

**S/Ord Lines Perd**

Sales order lines period. The number of sales order lines raised in the current period.

**S/Ord Lines Year**

Sales order lines year. The number of sales order lines raised in the current year.

**Select**

To display summary stock balances for all style/colour/size/fit combinations within a specific stockroom, select a stockroom by placing a 1 next to the stockroom code field (see style/colour/size/fit summary).

# Stock Enquiry Screen 3 (Option 1)

This is displayed when you select the stockroom using option 1 on the second screen.

The summary stock position is displayed for the selected products at the selected stockroom by style / colour / size and fit.

## Fields:

### Product

The full code and description is displayed.

### Physical

The stock on the shelf in the stockroom.

### Allocated

The stock allocated to all types of sales orders.

### Picked

The stock on pick status at the present time.

### Available

The stock available to allocate (free to sell).

### S/Ord Lines Perd

Sales order lines period. The number of sales order lines raised in the current period.

### S/Ord Lines Year

Sales order lines year. The number of sales order lines raised in the current year.

# Stock Availability Enquiry

## 10/STOEE

This enquiry displays current stock balances for a product (style/colour/size/fit) and an expected stock availability into the future, based on current sales orders and purchase orders. The enquiry identifies specific existing sales and purchase orders, including current sales order allocations.

# Stock Availability Enquiry Screen 1

 Select Stock Availability on the Enquiry menu.

This screen is used to select the specific product (style/colour/size/fit) and stockroom into which you want to enquire.

Stock Availability Enquiry

Product Code.?.?.. █                      \_\_\_\_

Stockroom....?..                      \_\_\_\_

F3=Exit    F4=Prompt

05-19    **SF**                      MW                      KS                      IM                      II    KENB20A    PET178S2

## Fields:

### Product Code

Enter the product codes (style, colour, size and fit).

### Stockroom Code

Enter the code for the stockroom you wish to display.

Press **Enter** to display the Summary screen.

*Note: If you do not know all possible colours, sizes and fits for a given style, entering only the style number in the first portion of the product code field and using the prompt will display the colour/size/fit matrix for that style. Specific colour/size/fit combinations may then be chosen by selecting them with a 1 and pressing **Enter**.*

*Likewise, inputting a style/colour combination only, will display the size matrix for just that colour. Selection of a size is made by placing a 1 in the correct size column, and pressing **Enter**.*

*However you arrive at the full style/colour/size/fit product code, the stock availability summary*

*screen will be displayed.*

## Stock Availability Enquiry Screen 2

This screen is displayed when you select a product on the initial screen. It shows current stock balances and projected stock availability for the product chosen, in a specific stockroom.

### Fields:

#### Part Number

Style/colour/size/fit product code and description.

#### Stockroom

Stockroom selected.

#### Issue Units

Stock issuing unit of measure.

#### Physical Stock

Stock physically on the shelf in the stockroom.

#### Frozen Stock

Stock frozen or removed from the total available stock.

#### Allocated Stock

Stock allocated to sales orders.

#### Quantity Picked

Stock currently with 'on pick' status.

#### In Transit

Stock in the process of being transferred into this stockroom.

**On Order**

Stock on purchase order for this stockroom.

**Forward Order**

Total outstanding sales orders for this stockroom.

**Quantity Packed**

Stock with current 'on pack' status.

**Available Stock**

Stock available (free to sell) to satisfy incoming sales orders.

**Lead Time**

General Lead time in weeks to purchase and receive product.

Stock Availability

**Order**

Existing sales or purchase order number.

**Item**

Line item number on the referenced sales or purchase order.

**Type**

Type of order referenced - sales, purchase, etc.

**Date**

Date the sales or purchase order is due.

**Customer/Supplier**

The customer/supplier name relating to the sales or purchase order.

**Qty O/S**

Quantity of the product 'outstanding', or expected.

**Available**

Projected available (free to sell) stock, if this order was allocated.

**Expected**

Projected expected stock if the particular sales order/purchase order is included.  
Stock availability is calculated for all existing sales and purchase orders for the product.

**Functions:**

**F13**

Allocations - selects the Stock Availability Enquiry - Allocations screen.

## Stock Availability Enquiry Allocations Screen (F13)

This screen is displayed when **F13=Allocations** on the Stock Availability Screen is selected.

It continues to display the current stock balance information for the product whilst it adds the allocated and on pick balances by specific sales order. This information may be useful if you are in a stock shortage position and you need to reconsider your order/allocation situation.

### Fields:

#### Style/Colour

Enter the specific style/colour on which you wish to enquire.

#### Stockroom

Enter the stockroom on which the enquiry is based. Leave this field blank if all stockrooms are required.

Press **Enter** to display the detail screen.

## Time Phased Availability Enquiry Screen 2

This screen is displayed when you press **Enter** on the initial screen. It shows the level of stock as purchase orders become effective.

|                                                           |                                    |              |           |           |           |                 |           |

### Fields:

#### Div

This is the division for the product.

#### Lead Time Days

This is the time in weeks required to purchase and receive the product.

#### Size

The size of the stock selected.

#### On Hand

This is the physical free to sell stock available.

#### Available To Ship

The total stock available to ship.

#### PO/DeIDte

Purchase order/delivery date. This is the purchase order/delivery date for the product.

### Functions:

#### F10

P/O delivery date - Not shown on the initial screen. This displays the Delivery Date window.

**F13**

Sales orders - This shows the sales orders that are reserved against the selected purchase order number.

**F14**

PO open Qty - shows the quantity on the selected purchase order.

**F15**

Total PO Qty - shows the total quantity on the selected purchase order.

**F16**

PO enquiry - This displays the purchase order enquiry.

**F19/F20**

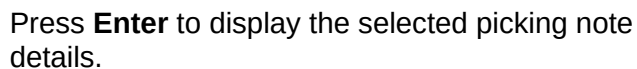

These display additional size details to the left or right of the colour/size/fit matrix.

# Orders Awaiting Despatch Enquiry

## 12/STOEE

This enquiry is used to display details of picking notes generated and awaiting confirmation of despatch. A prompt is provided to browse through unconfirmed picking notes. If further order information is required, the whole order enquiry may be accessed directly.

## Orders Awaiting Despatch Enquiry Screen 2

This screen is displayed when you press **Enter** on the initial screen.

The details of the picking note are displayed. The whole order enquiry can be used if further information is required. The top part of the screen contains the information relating to the picking note header.

#### Type Of Enquiry

Types of enquiry are:

- 1 - Original Estimates. The original estimates or forecast of anticipated sales quantities for this style within this season.
- 2 - Latest Estimates. The latest, revised estimates of anticipated sales quantities for this style within this season.
- 3 - Ordered. Actual customer orders for the style and season.
- 4 - Allocated. Actual stock allocated to this style against this customers orders.
- 5 - Picked. Actual stock picked for this style against this customers orders.

6 - Despatched. Actual stock despatched for this style against this customers orders.

7 - Original-Ordered. The unsold portion of the original forecast (original estimate minus quantities ordered).

8 - Latest-Ordered. The unsold portion of the latest forecast (latest estimate minus ordered quantities).

In options 7 and 8 if any quantity figures appears in reverse image, then the customer has ordered more than the estimate (original or latest).

Press **Enter** to see the Matrix Window.

## Mail Order Enquiry Matrix Window

Selecting the type of enquiry desired will result in the colour and size matrix window which will contain estimate values or stock balances as requested.

### **Functions:**

#### **F19/F20**

These functions display additional size details to the left or right of the colour/size/fit matrix.

## Description File Enquiry

### 14/STOEE

This enquiry displays details from the descriptions file. The screens are the same as those used for maintenance except updating is not allowed.

# Descriptions File Enquiry Screen 1

 Select Descriptions on the Enquiry menu.

This screen displays a list of the Major descriptions set up in the system for selection.

Press **Enter** and select a description code to expand the format of the data.

# Customer Enquiry

## 15/STOEE

The customer enquiry enables the display of all of the details of a customer which may be relevant to the administration of sales orders. The format of the screens is exactly the same as in the maintenance procedure. The details of Statement, Invoice, Delivery and sales details may be displayed. The meaning of each field is fully explained in the customer maintenance section. Several screens can be viewed from Customer Enquiry:

- Statement Account.
- Bank Details.
- Customer Division Details.
- Invoice Account.
- Deliver to Account.
- Sales Details.
- Style Additional Details.

# Product Enquiry

## 16/STOEE

This is a multi-function enquiry intended to display all of the data from the Style Master and the stockroom balances. Entry can be at the level of the static data, a summary of the company stock position or the stockroom balances. Batch and FIFO cost records can be displayed from any stockroom.

## Product Enquiry Selection Screen

Select Product on the Enquiry menu.

The purpose of this screen is to select the style of enquiry and choose the correct level of entry.

### Fields:

#### Product

Enter a valid product code (style number) and stockroom.

Tip: A style selection prompt may be used to display a list of styles.

The next screen to be displayed is dependent upon the action taken.

### Functions:

#### F13

Display stock summary screen for the entered item.

## Select Colour(s) Window

This is displayed when you press **Enter** after inputting a style number in the product code field on the initial screen.

Select the colour/size/fit combinations on which you wish to enquire by placing a 1 in the appropriate column. Multiple colour/size/fit selections may be chosen.

Press **Enter** to display the first stockroom balance for this item.

### Functions:

#### F7/F8

Select next product, select previous product.

#### F12

Returns to Product/Stockroom Enquiry Screen 1.

## Product Enquiry Stockroom Balances Screen

 This screen is displayed when you press **Enter** on the Product Stockroom screen and shows stockroom summary information under the following headings:

- Stock balances in issue units.
- Usage and stock management details.
- Costing and valuation.
- Preferred suppliers.
- Units of measure.
- Actioned dates.
- Standard bin locations (Two maximum).

The screen also provides function keys to display details of the Lots and/or FIFO costs, where these are supported for an item.

All the balances displayed are in issue units of the item/stockroom. The value of stock is calculated as per the costing method selected for the item and this is shown on the screen.

 Press **Enter** to display details of this item for the next stockroom.  
If you press **Enter** again it will return to the item select screen.

 Press **F7=Next item** to display the next product (colour/size/fit combination).

## **Functions:**

### **F7/F8**

Selects next product, previous product.

### **F13**

Lot details - Not used by the system.

### **F19**

FIFO cost details.

### **F24**

Display additional function key options  
(location and FIFO details).

## Product/Stockroom Enquiry Screen 3

This screen displays the opening and current position of the FIFO batches for a product/stockroom. Both date and item are displayed.

# Depot Profiles Enquiry

17/STOEE

Select Depot Profiles on the Enquiry menu.

This screen displays details of those inventory stockrooms nominated as sales warehouses. There are two screens, the first lists the warehouses:

## Fields:

### Allocation Time Fence

The allocation time fence is a period of time in days. If the delivery due date is less than the current date plus the time fence, allocation will be attempted.

The function of all other data is discussed in the Maintenance section.

## Price/Discount Profiles Enquiry

**18/STOEE**

Each Price/Discount list has a profile which controls its key attributes. The first screen enables the profile to be selected. A list of profiles may be displayed.

Select Price/Discount Profiles on the Enquiry menu.

### **Fields:**

#### **Authority**

The user ID of the person authorised to maintain the list.

#### **Currency**

The code of the currency of the price/discount list.

#### **Text**

The title of the list is displayed.

# Price List Enquiry

19/STOEE

Select Price List on the Enquiry menu.

The purpose of this enquiry is to display the details of a price list. The items from the price list that are displayed depend upon the entries in the first screen:

|                         |                              |               |                           |

| 05-23                   | SA                           | MW            | KS IM II KENB20A PET178S2 |

## Fields:

### Price List Code

Enter a price list code.

### Effectivity Date

Enter a date.

### Style

Enter a style code.

The complete details of a price list may be displayed by entering only the price list code. Prompts are available to assist in selecting price list codes and specific styles.

The prices effective on the nominated date may be displayed by entering the price list code and date.

The price for a particular style may be displayed by entering the price list code and style number.

The form of the displayed data is always the same as in the Price List Enquiry screen:

## Discount List Enquiry

### 20/STOEE

Select Discount List on the Enquiry menu.

The purpose of this enquiry is to display the details of a discount list. A single discount list code may have discounts specified for items, a discount group or an order. The Discount List Enquiry screen enables the required selection to be made. The discount is displayed by selecting any of the following attributes:

- The discount list code - this may be selected from a prompt.
- The customer for whom the discount applies - this may be selected from a prompt.
- Whether the discounts are for an item, a discount group or a whole order.
- The effective date for the discount.

## Kit Item Enquiry

21/STOEE

Select Kit Item on the Enquiry menu.

On the initial screen enter a Kit item number, then select the type of kit enquiry you require. This is done by selecting one of the following options:

- 1 - Kit header
- 2 - Kit options
- 3 - Kit details

Select an option and press **Enter** to display the selected option detail screen.

## Item Maintenance Screen (Option 1)

This is displayed when you select option 1 on the Kit Item initial Selection screen.

### Fields:

#### Item Type

This is the item type chosen from those defined on the descriptions file against major type PTYP.

#### Item Class

This is the item class chosen from those defined on the Descriptions file against major type PCLS.

#### Product Group Major

This is the item group chosen from those defined on the Descriptions file against major type PGMJ.

#### Product Group Minor

This is the item group chosen from those defined on the Descriptions file against major type PGMN.

#### Division

Enter a division from those defined on the Descriptions file against major type DIVN.

#### Sub-Division

Enter a sub-division chosen from those defined on the Descriptions file against Major Type SDIV.

The above codes are used to define which division of the company has responsibility for this particular product.

**Purchase Unit**

Enter a unit chosen from those defined on the Descriptions file against Major Type UNIT.

**Stock Unit**

Enter a unit chosen from those defined on the Descriptions file against Major Type UNIT.

**Issue Unit**

Enter a unit chosen from those defined on the Descriptions file against Major Type UNIT.

The above units are the three valid units of measure to be used in association with this product.

**VAT Code**

Enter a VAT code chosen from those defined on the Descriptions file against Major Type VAT.

**Discount Group**

Discount lists can be applied to selected discount groups. Enter a discount group chosen from those defined in the descriptions file against major type PGR.

**Inventory Source**

Enter an inventory source code chosen from those defined on the Descriptions file against Major Type INSC. This field is not currently used within this application.

**Stock To Purchase Conversion Factor**

Enter nine (9) numeric characters with five (5) decimals to specify the relationship between the stock and purchase units. If stock and purchase units are the same, this should be a 1. If, for example, stock units are 'Each' and purchase units are 'Tens' then this conversion factor should be 10. Default is 1.

**Issue To Stock Conversion Factor**

Enter nine (9) numeric characters with five (5) decimals to specify the relationship between the issue and stock units. If issue and stock units are the same, the conversion factor should be a 1. If, for example, the issue unit is 'Each' and the stock unit is 'Tens' then the conversion factor should be 10.

Default is 1.

**Weight Per Selling Unit**

Enter eleven (11) numeric characters, four (4) decimals to specify the weight of a single selling unit.

**Functions:**

**F21**

### Fields:

#### Allow Overrides

0 - No amendments will be made.

1 - The kit may be modified for each individual order. SKUs can be added or deleted, or quantities changed. Any amendments made will only affect this order.

#### Price Roll Up

0 - If you wish the price of the kit to be taken from the price list entry.

1 - If the price is to be accumulated from the sum of the components.

#### Allocate To Kit Level

This determines whether all components for a kit are allocated in relation to the kit quantity, or up to the available stock level. The quantity picked and despatched will be in whole kits.

0 - Do not allocate to kit level.

1 - Allocate to kit level.

## Kit Maintenance Screen (Option 3)

This screen is displayed when you select option 3 on the Kit Items Selection screen. The details of the Kit Item selected on the previous selection screen are displayed.

If you want to change any of the details use the Enterprise Group Maintenance option.

# SKU Order Level Enquiry

24/ST0EE

Select SKU Order Level on the Enquiry menu.

This enquiry can be used to summarise the sales order details by Style, Style / Colour or Stock keeping Unit (SKU) level.

The details displayed are for information purposes only and cannot be amended using this option.

## Fields:

### SKU Enquiry/Order Status

This field is used to select the status of the sales order on which you wish to enquire. These are defined on the Descriptions file within Inventory management as STAT. You can enter the following:

- 1 - Open orders.
- 2 - Complete orders.
- 3 - Cancelled orders.
- 4 - All orders.

### SKU enquiry

These parameters are defined on the Descriptions file within Inventory management as DISP. You can enter the following:

- 1 - Items first.
- 2 - Orders first.

### Level of Display

This is the level at which the details for the sales order will be displayed. These are defined on the Descriptions file within Inventory management as LEVL. You can enter the following:

- 1 - Style.
- 2 - Style / Colour.
- 3 - Full SKU.
