Chapter 4

Reports

Status Reports And Reference Files

The Sales Order Processing application consists of a full range of status and management reports. The status reports are lists of data taken from the reference files. These are specifically designed to include information for the sales functions and cover the following reference files:

- Items (styles).
- Customers.
- Price Lists.
- Discount Lists.

There are a number of exception reports to help direct management attention to those parts of the business that require attention. These are:

- Unconfirmed Picking Notes.
- Suspended Orders.
- Orders with Zero Price.
- Gross Margin Exceptions.
- Selling Price Overrides
- Zero Value Invoice Lines.

The following reports include a measure of outstanding work and can, therefore, be used to assist planning:

- Outstanding Orders.
- Pick Lists.
- Stock versus Outstanding Orders.

Products File Listing

1/STOER

This report is used to list all products for the company, printing the information specifically selected for the sales function:

Style Number.

Description.

External and Internal Text.

Key Analysis Codes.

Frequency

As required.

Stationery

Standard listing paper.

Print Positions

132.

New Page

Page overflow.

Totals

None.

Selection

None.

Sequence

Style Number.

Following selection from the menu, a screen is displayed to confirm that processing was intended.

Press **F8** to submit this procedure to the job queue.

Customer File Listing

2/STOER

This procedure is used to list all customers for the company and print the information relevant to the sales function. The customers additional information is printed together with the invoice and 'deliver to' addresses. The following information is printed:

- Account number.
- Currency code.
- Invoice address.
- Corporation.
- Delivery address.
- Division.
- Stockroom.
- Sub division.
- Price list.
- Region.
- Cash discount.
- State .
- Priority.
- Salesman.
- Statement Account Code.
- Customer class.
- Currency rate.
- Territory

The following information is identified as being either on or off

- Back order.
- Part delivery.
- Manual pick list.
- Order search.
- Carriage.
- Acknowledgements.
- Order reference.
- Default price list.
- Special customer.

- Invoice consolidation.

Frequency

Selection

None.

Sequence

Customer code.

Note: Following selection from the menu, a screen is then displayed which asks you to confirm that processing was intended.

Press **F8** to submit this procedure to the job queue.

Outstanding Orders Report

3/STOER

This procedure reports on orders in the database, subject to the selection criteria chosen.

Frequency

As required.

Stationery

Standard listing paper.

Print Positions

132.

New Page

Change of stockroom.

Totals

Quantity outstanding. Value outstanding.

The report may be run for all orders or a selection of orders. The selection is made when you enter the appropriate parameters.

The orders may be made on a range of :

- Entered order lines.
- Line delivery due dates.
- Items.
- Customers.
- Sales order numbers.

The selection may apply to all stockrooms or a single stockroom, and it may include the following:

- Allocated order lines.
- Unallocated order lines.
- Both allocated and unallocated order lines.

Press **F8** to submit this procedure to the job queue.

Forward Orders Summary Report

4/STOER

This report produces a snapshot summary view of existing product order quantities, by future required date. Sales order quantities to be included on the report may be selected by division, customer account code or range, and by style or style range. Order quantities are totalled by month and summed for total outstanding.

Frequency

Ad-hoc, as required.

Stationery

Standard listing paper.

Print Positions

Following selection from the menu, a screen to confirm that processing was intended is displayed.

Press **F8** to submit this procedure to the job queue.

Suspended Orders Report

6/STOER

This procedure lists all suspended orders with the reason for the suspension. Orders that are suspended do not have stock allocated to them by the batch allocation procedure. Orders may be suspended by choice or by the system. The reasons for system suspension are:

Cs

Customer is on credit stop.

Cl

The credit limit was exceeded by the order.

Fp

A manual price was entered during order entry or amendment and requires confirmation.

Np

An order line has no price.

Other suspension reason codes are set up on the descriptions file, and can be applied to the order.

Frequency

Daily, i.e. credit control.

Gross Margin Exceptions Report.

9/STOER

This procedure reports on high or low margins on sales order lines. The margin is calculated as a percentage. It may be either:

Cost value ___ x 100 OR Sales value ___ x 100

Sales value

Cost value

The result is then compared with two control parameters to ensure the gross margin is between the set limits. Exceptions are listed.

The control parameters are held on the description file (Major type MARG) in the percentage field. The entries are:

U

Upper margin as a percentage of cost.

L

Lower margin as a percentage of cost.

Us

Upper margin as a percentage of sales.

Ls

Lower margin as a percentage of sales.

Frequency

Regularity, e.g. daily.

Sequence

By salesman code.

Following selection from the menu, a screen is displayed to confirm that processing was intended.

Enter the following data:

Fields:

Period Range

Enter a valid period range - format YYPP.

Divisions

Enter up to six valid division numbers.

Prod. Group Major/Minor

Enter up to six valid major/minor numbers.

Season

Enter up to six valid season numbers.

Style Range

Enter a valid from and to style number range.

Customer Range

Enter a valid from and to customer number range.

 Press **Enter** to validate the entries.

Functions:

 Press **F8** to submit to the job queue.

Freestock Summary Report

19/STOER

This option produces a summary report of all freestock available.

Press **F8** to confirm.

The report is printed in standard report format.

Cancelled Orders Audit Report

20/STOER

This option produces a report listing all the cancelled orders within a specified date range.

Fields:

From Date

The date from which the report is to start listing the cancelled orders.

To Date

The date up to which the report will list the cancelled orders.

Print All Audit Records

You have the option to print all the records or not:

1 - Print

2 - Do not print

Press **F8** to accept the entries and submit the report to batch.

Suspended Orders Audit Report

21/STOER

This option produces a report listing all the suspended orders within a specified date range.

Fields:

From Date

The date from which the report is to start listing the suspended orders.

To Date

The date up to which the report will list the suspended orders.

Print All Audit Records

You have the option to print all the records or not:

1 - Print.

2 - Do not print.

Press **F8** to accept the entries and submit the report to batch.

Outstanding Orders Report

22/STOER

This option produces a report listing all the outstanding orders within a specified range. These ranges can be:

- Delivery dates.
- Product code.
- Order numbers.
- Account numbers.
- Salesmen.

The selection may apply to all stockrooms or a single stockroom and may include:

- Suspended order lines.
- All order lines.

Press **Enter** to accept the entries and submit the report to batch.

Back Orders Stock Exception Report

23/STOER

This procedure compares the orders which are due to be delivered or should have been delivered, with the stock available to meet that requirement. An order is due for delivery when its delivery due date is within the timefence for its stockroom. Two reports are produced; the Stock Exception and the Credit Exception report.

Frequency

Just prior to a batch allocation run to allow for any manual allocation prior to the system action or credit control action.

Stationery

Standard listing paper.

Print Positions

New Page

Page Overflow.

Totals

None.

For all depots or a selected depot

F8 is used to submit the procedure to the job queue. Press **Enter** to accept the entries and submit the report to batch.

Supply/Demand Exceptions Report

24/STOER

This option generates a report that details any changes affecting buy to order, make to order or direct delivery orders. The report can be sequenced to show sales orders against supply orders (purchase or works) or supply orders against sales orders. In addition you can select purchase orders, works orders, or both, for inclusion.

Exception messages include:

- WO qty reduced on active order to inform you that reservations have been adjusted to match a new WO quantity for a single sales active works order.
- WO qty reduced on active order - reservations out of balance to inform you that an active WO had reservations relating to several sales orders. In this case, the reservations have not been adjusted to match the new WO quantity.

Fields:

Report To Be Sequenced By:

- 1 - Supply sequence.
- 2 - Sales order sequence.
- 3 - Both.

Include Purchase Orders

- 0 - No.
- 1 - Yes.

Include Works Orders

- 0 - No.
- 1 - Yes.

Functions:

Press **F8** to submit the procedure to the job queue. Press **Enter** to validate the entry.

Purchasing/Selling Variance Report

25/STOER

This option generates a report which provides the Enterprise Group of companies with the facility to compare customer and supply company prices and therefore verify that they have been created equally.

This screen is displayed when you select the Purchasing/selling variance report option.

DM300	GS - GEORGE'S SUPPLIES	USER: GBJBARW2	9/12/97

F3=Exit F8=Submit Report			
6-30 SA MW KS CL IM DM II STUD140 KB PET179S1			

Fields:

Prices to Reconcile

You have the choice to select either:

1 - Selling prices, this is the default, it means the system will show the customer prices of items and the corresponding supplier prices in the sales demand companies defined on the purchasing system that they sell to.

0 - Purchase price , these are the supplier prices of items and the corresponding customer prices in the supplying companies defined to the sales order system which they buy from.

Records to print

You have the option of showing all records extracted, only those with a price difference or those with no matching price or sales record. Choose either:

0 - Exceptions,

or

1 - All.

Prices Tolerance

This is the percentage price tolerance

Enter the parameters required and select
F8=Submit Report to print the report.

Consolidated Shipping Report

26/STOER

This allows you to produce a consolidated shipping report which takes the form of a summarised list of despatch notes. The report can be printed on an ad-hoc basis.

The selection screen is displayed when you select the Consolidated Shipping Report option.

F3=Exit F4=Prompt

5-41 SA MW KS CL IM DM II STUD140 KB PET179S1

Fields:

Consolidator or Customers DC

This allows you to select the criterion for the report. Enter either a 1=Consolidator, or a 2=Customer DC. This is a mandatory field, so you must enter a 1 or 2.

Consolidator or DC

This is the name of the Consolidator or Customer DC selected for the report. A prompt is available. You only need to enter this field if you wish to restrict the selection.

Despatch Date

Enter a range of dates. This is not mandatory, but if a range of dates are entered only records with a despatch date within the specified range are selected. If no date range is entered all records are selected.

Press **Enter** to validate the entries and submit the batch job to print the report. The report will then print the records in despatch date sequence. A message is then displayed which tells you that you can submit another report if required.
