Glossary

Glossary

Attribute

In Sales Analysis, a characteristic of either a customer or an **item**.

Budget

A forecast or estimate expressed in a **value**, against **attributes** of **items** or customers.

Database

The collection of Sales History information used for enquiries and reports.

Data Element

A discrete piece of information in the **database**.

Descriptions File

This is a file maintained within Inventory Management which defines a number of parameter codes and their descriptions.

Item

The single term used to determine an element of stock identified by a unique number.

Library

Means of grouping programs, files etc. on the database.

Ranking

Sequencing by **value**, e.g. cost or quantity. Used in Sales Analysis as a means of report sequencing.

SKU

Stock Keeping Unit. The SKU represents the lowest level of definition for a style whether that be a simple one dimension or four dimensional product. For example, a item with an assigned style with colours, fittings and sizes is a four dimensional product. Together, these dimensions constitute the SKU and differentiate it from other items.

Value

A numeric **data element**, usually representing money or a quantity. In Sales Analysis the values used are those associated with invoices.
