Chapter 6

Operational Enquiries

Introduction To Operational Enquiries

You can use these options to make various enquiries:

- Error Log.
- Active Jobs.
- Job History.
- User Authority.
- Menus.

You can also, in many instances, produce hard copy reports.

To access Operational Enquiries select option 5 from the Application Manager Main Menu.

Each application task called from a menu is logged within Application Manager. This information includes the User Profile Task Code, and the time the task started and time completed. Thus, Application Manager maintains a complete history of all application tasks. This job log provides the basis for many of these enquiries.

Error Log

Use this option to enquire on, and print, all application errors logged by the Application Manager.

Error Enquiry Screen

Select option 1 from the Operational Enquiries menu and press **Enter**.

This screen shows the application ID, environment code and release level. The job name shows for interactive tasks, the workstation where the error occurred, or for batch jobs, the batch job name. The screen also shows the user, date and time and program and the library of the error.

This screen provides the full details of the error required by your Software Support Organisation.

Press **Enter** to return to the Error Enquiry screen, or **F3** to return to the Operational Enquiries Menu.

*Note: If you wish to clear the error log then use **F23**.*

Active Job

This enquiry displays a list of any current jobs and their users.

Jobs Active (All Applications) Enquiry Screen

Select option 2 from the Operational Enquiries menu and press **Enter**.

A list of all jobs active, or waiting on job queue(s) within applications supported by Application Manager is displayed.

```
XA701                      Application Manager                      system: STUDB30A

Fields:

User

Identifies the user signed on to the application.

Terminal

Identifies the workstation at which, for interactive tasks, the user is signed on, or for batch jobs, the workstation from which the job was submitted.

Usage

Describes the exclusivity of use of the company or system which this user has taken, and shows the company, if applicable, to which the user is signed on.

SHR xx is shared usage of company xx, allowing any other shared usage function to take place within this application.

SHn xx indicates shared use of company xx by a function with share class n. Any other function with a share class of n, or SHR usage, may be used. Any function with a share class other than n will be prohibited from use.

SHR&& indicates that the user is performing a task which does not require company validation.

EXC xx indicates exclusive use of company xx, not allowing other functions to take place in company xx, but allowing any function within other companies.

EXC SYS is exclusive use of this application. No other activity may take place within this application.

Note: For a more detailed explanation of Share Classes see the Maintain Tasks Section.

Application Task

Description of the function taking place.

Job Name

Leave blank for interactive jobs or enter the job name of the submitted batch job. Entries displayed on the list are grouped by application.

Enter 2 against a selected job to send a message to the user's workstation.

Enter 1 against a selected job to display the job's full details.

Job Enquiry Screen

This screen is displayed when you enter 1 against a job's details on the Jobs Active (All Applications) screen.

This screen displays:

- The application within which the job is running and the exclusivity of use of the company or system.
- The job name for batch jobs.
- The user performing the task, or for batch jobs, the user who submitted the job.
- The unique job number assigned by OS/400 to this job.
- The workstation at which the user is signed on, or in the case of batch jobs, from where the job was submitted.
- The unique job number assigned by Application Manager to this job.
- The task code and description of the job.
- The status of the job.
- The date and time when the job was started.

Fields:

Option

Enter one of the following:

- 1 - Current Jobs.
- 2 - Archived Jobs.
- 3 - Flexible Enquiry.

-  Select the required option and press **Enter**.

Current Jobs Enquiry Screen

Select option 1 from the Job History sub-menu, to display this screen.

This displays a list of jobs which have been run under the control of Application Manager since the last day-end.

For each job this displays the user, workstation and describes the task taking place. For batch jobs the job name is also displayed.

When you run the Application Manager day-end routines this history file is cleared down and detail is archived off to separate files, therefore keeping only up-to-date detail on this screen.

```

Archived Jobs Enquiry Screen

If you select option 2 from the Job History sub-menu a screen will be displayed:

Use this option to enquire on completed jobs, cleared from the live files by the Application Manager day-end routines (see the Maintain Applications chapter and the Day-End Parameters section).

XA709		Application Manager			System: STUDB30A	
Enquire on Archived Request History						
1=Enquiry		2=Flexible enquiry				
3=Delete member		4=Delete member in batch				
5=Create access path		6=Create access path in batch			7=Delete access path	
Type options, press Enter						
Opt	Archive Member	Creation Date	Access Path	No of entries	Date From	Date To
-	X940426	27/04/94		20.677	08/04/94	26/04/94
-	X940429	30/04/94		3.836	27/04/94	29/04/94
-	X940506	7/05/94		6.073	30/04/94	06/05/94
-	X940509	10/05/94		1.615	07/05/94	09/05/94
F3=Exit F11=Delete all members in batch						

Fields:

Opt

Selection field. Enter one of the following:

1 - Enquiry. To enquire on jobs archived into this member.

Note: In all cases an access path must exist for the selected member prior to attempting the enquiry.

2 - Flexible Enquiry. To select the jobs within the member which you would like to have displayed. The operation of the flexible enquiry for an archived member is the same as for current members, this is described later in this chapter.

3 - Delete Member. To delete a member totally from the system. No more enquiries will be available on jobs in this member. This option deletes the member on-line, and so will prevent any other work taking place at the screen until the task has completed.

4 - Delete Member In Batch. To flag a member for batch deletion. Once all members to be deleted have been flagged with T, then use **F11** to submit a batch job to delete them.

5 - Create Access Path. To create an access path for this member to allow for enquiry. This option creates the access path on line, and so prevents any other work taking place at the screen for a short time.

6 - Create Access Paths In Batch. To create access paths for several members at once by submitting a job in batch mode. This job must complete successfully before enquiries may be made.

7 - Delete Access Path. To delete an existing access path. This slightly improves system storage overheads associated with Application Manager.

Note: Once an access path has been deleted, it must be re-created by using options 5 or 6 prior to making enquiries on that member.

Tip: It is recommended that old members should be deleted from the file on a periodic basis.

Enter 1 against an archived member, to display an Archive History of all jobs between the selected dates.

Archived Jobs Detail Screen

-  Enter 1 against an archived member on the Archived Jobs screen to display the Archived Jobs Detail screen.

This screen displays the terminal, usage and task for the selected job. For batch jobs this also displays the job name.

```

Fields:

0

Selection field. Enter one of the following:

- 1 - Select. To display more details for the job.
- 2 - Messages. To send a message to the user.

-  Enter 1 to display full details of a selected job.

Archived Job Selected Details Screen

-  Enter 1 on the Archived Job Details Screen to display details for a selected job.

This screen displays the details for the selected job.

XA701		Application Manager		System: STUDB30A	
Job Enquiry					
Application . . CP 01					

Exclusive use of Application					
Job name . .		User . . QPGMR		CPF job no . . 009818	
Terminal . . DEM001		Internal job no . .		1059	
Task **02 Exclusivity Group 02					
Status . . . On line - Completed					
Started . .		1/08/90		8:16:06	
Finished . .				8:16:07	

-  Select **F5** to refresh the display. Select **F3** to return to the Main Menu.

Flexible Job Enquiry Screen

Select option 3 from the Job History sub-menu to display this screen.

Use this screen to select the jobs which have been run within Application Manager since the last Application Manager day-end.

You can specify a range for any of the parameters displayed, and sequence the jobs by placing a number from 1 to 6 in the Key Priority column.

XA711		Application Manager		System: STUDB30A	
Flexible Job Enquiry					
All requests since last day end.					
Specify selection criteria and sort order for enquiry					
Field	From Value	To value	Key Priority	Key Sequence	
Application (eg. GL ABC 01)	_____	_____	1	A	
Company code	_____	_____	-	A	
User	_____	_____	-	A	
Work station	_____	_____	-	A	
Job name	_____	_____	-	A	
Task code	000	0000	-	A	
Date (DDMMYY)	00000	000000	-	A	
Time started	00000	000000	-	A	
Job status to include . . .	0 (0=All, 1=Active, 2=Finished)				
Blanks (zeros) means first in the from fields and last in the to fields. To select a single value for a field use from and to values the same. Note the DUP key may be used in the to fields.					
F3=Exit					

Press **Enter**, to display a list of all jobs satisfying the selection criteria. The detail displayed is the same as described for Current Jobs, see the Current Jobs section.

User Authority

Use this enquiry to display which Application Manager menus a user is authorised to, or the Application Manager-defined tasks a user is authorised to. For authorised menus you can also display the menu image and the option or functions the user can use.

User Authorisation Enquiry Screen

Select option 4 from the Operational Enquiries menu.

```
XA125                      Application Manager                      System: STUDB30A
User Authorisation Enquiry

Enter user name  BRIGHTN
Selection . . .  1      (1=Authorised Menus)
                      (2=Authorised Tasks)
                      (3=Authorised Companies)

F3=Exit  F4=Browse
```

Fields:

User Name

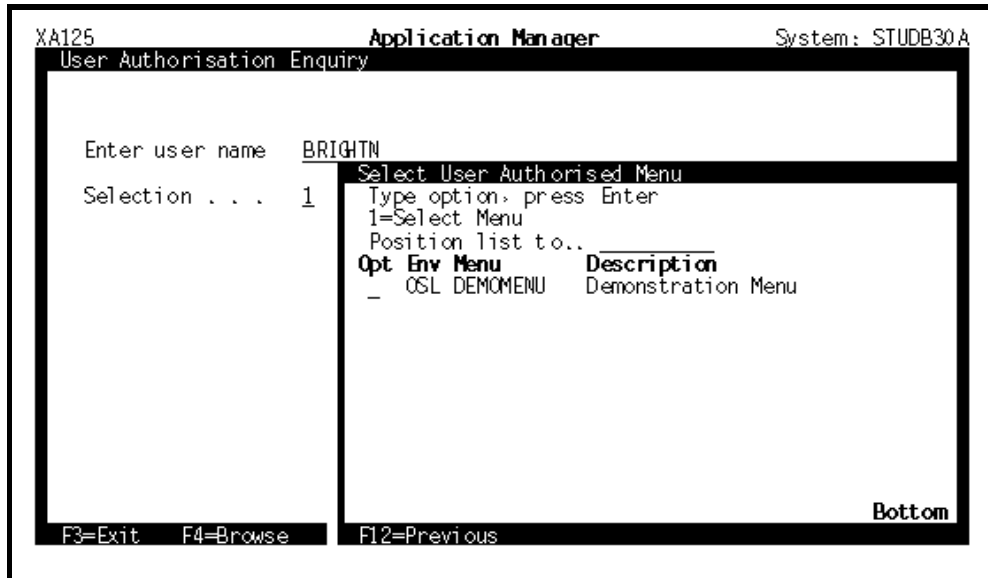

This defaults to the current user name. To select another user press **F4=Prompt**. Then enter 1 against the required profile and press **Enter**.

Selection

- 1 - To enquire on the menus which the user is authorised to.
- 2 - To enquire on the Application Manager tasks which the user is authorised to.
- 3 - To enquire on the authorised companies within an application.

Authorised Menus Screen (Option 1)
