Chapter 5

Documentation

Library Name

Select option 1 from Documentation and press **Enter**.

This report details all of the libraries on your system regardless of whether or not they have been defined to Housekeeping. The information displayed includes:

- Library name and text.
- Date and Time last saved.
- Last save media type and location.
- Messages; for example, Not defined to Housekeeping, Never saved.

Library By Last Save Date

Select option 2 from Documentation and press **Enter**.

This report sequences libraries by the date they were last saved. The following details are included in the report:

- Library name and text.
- Date and Time last saved.
- Last save media type and location.
- Messages; for example, Not defined to Housekeeping, Never saved.

Library Owner

Select option 3 from Documentation and press **Enter**.

This report provides the following information, sequencing by the library owner.

- Library name and text.
- Date and Time last saved.
- Last save media type and location.
- Messages; for example, NOt defined to Housekeeping, Never saved.

Library Size

Select option 4 from Documentation and press **Enter**.

This report is sequenced by library owner and then library size. It provides the following information:

- Library owner.
- Library name and text.
- Library size.

Note: The library size details are as at the last time the library sizing routines were run. See [Re-size Libraries](#) section .

Not Changed Since Given Date

Select option 5 from Documentation and press **Enter**.

Use this report to determine those libraries which may be obsolete.

HK320 Housekeeping System: STUDB30A

Libraries Not Changed Since Date Report - Enter Date

You have selected to list libraries that have not changed since a given date. Enter the cut-off date for the report : ____

Enter 1 to use the housekeeping last change date or 0 to use the library last change date : 1

(NOTE : to report by using the last change date of library objects will take alot longer than using the housekeeping date.)

Press ENTER to submit report

F3=Exit

You can select a date from which to test whether or not the library has changed.

You can either use the last change date held within the Housekeeping files, or you can examine the last change date held against each of the objects contained within each library.

Note: If you select to use the library object last change date then depending on the number of libraries and the number of objects contained within those libraries this function could take a long time to process.

The report contains the following information:

- Library name and text.
- Library owner.
- Last saved date and time.
- Last saved media type and location.
- Last changed date.
- Date last checked by Housekeeping.

Note: The date a library was last re-sized is either when the day-end function re-size libraries was run or it is re-sized if its save frequency indicates it should have been saved.

Passed Expiry Date

Select option 6 from Documentation and press **Enter**.

This function produces a report of those libraries which have passed their expiry date. The library expiry date is contained within the library definition, see Control Information section.

The report contains the following information:

- Library name and text.
- Date and Time last saved.
- Last save media type and location.
- Messages; for example, NOT defined to Housekeeping, Never saved.

Library By Last Used Date

This report provides a list of libraries sorted by the date they were last used.

When you run the report you can choose between the last change date held by Housekeeping or to use the last change date held by OS/400. The last used date within OS/400 is held at object not library level. Thus, if you select to use the library last change date held by Housekeeping the report is produced more quickly. The report provides the following information, sequenced by last changed date.

- Library name and text.
- Last changed date.
- Library size.
- Library creator.
- Library owner.
