Chapter 3

Operational Enquiries

Introduction To Operational Enquiries

The following enquiries are available to help you manage your system:

- Display Management log.
- Job Schedule by date.
- Job History by Date.

Select option 9 from the Main Menu to display the Operational Enquiries window.

The screenshot shows the Machine Manager interface. At the top, it displays 'MM000', 'Machine Manager', and 'System: STUDB30A'. The 'Main Menu' is a list of 10 options, with '9. Operational Enquiries' highlighted. An 'Operational Enquiries' window is open, showing a list of 4 options: '1. Display Management Log', '2. Job Schedule by Date', '3. Job History by Date', and '4. Main Menu'. Below the menus, there is a prompt 'Selection or command' followed by a line for input. At the bottom, there are four columns of function key assignments: F3=Exit, F4=Prompt, F6=Messages, F9=Retrieve; F10=Command Entry, F12=Previous, F14=View Jobs, F24=More Keys.

```
MM000                                Machine Manager                                System: STUDB30A

Main Menu
1. Auto Day-Start Jobs
2. Auto Day-End Jobs
3. Job Schedules

F3=Exit      F4=Prompt    F6=Messages  F9=Retrieve
F10=Command Entry  F12=Previous F14=View Jobs F24=More Keys
```

Machine Manager Log

Select option 1 from the Main Menu to display the Display Machine Management Log screen.

All initialisations and completions of the Day-Start, Day-End and Power Down procedures, plus important intermediate steps, are recorded in the Machine Manager Log.

MM211	Machine Manager			System: STUDB30A

-	J / P Job Scheduler processing.	21/06/91	19:04:17	JOBSCH	QPGMR	
More...						
F3=Exit F5=Refresh F12=Previous F17=Subset						

An option to clear down the log at regular intervals can be set up using the standard job Clear Machine Manager log as part of your Auto Day-End Jobs (see the section Maintaining Auto Day-End Jobs).

This job enables you to keep a specific number of days history, rather than clearing the entire log.

Fields:

Entry Type

The first character indicates the type of job:

E - Auto Day-End job

I - Initiator

J - Job Scheduler

P - Power Down

S - Auto Day-Start Job

The second character indicates the current status of the job:

A - Active

E - Completed

J - Submitted

S - Started

W - Waiting

X - Warning

A description of the job is also given.

Date/Time

The date and time at which the job was submitted.

Job

The name of the submitting job.

User

The user profile of the user who submitted the job.

Display Machine Management Log Screen

For more detail about a specific job enter a 1 next to the required job and press **Enter**.

MM211	Machine Manager	System: STUDB30A
Display Machine Management Log		
Entry Type P		
Sub-Type J Power down system submitted.		
Date 24/06/91		
Time 20:07:36		
Job Number 021508		
Job Name JOBSCH		
User QPGMR		
Data Submitted Job 021539/QPGMR/PWRDWN SYS		
F3=Exit F12=Previous		

Functions:

F17

To limit the display to selected job entry types.

Once you have chosen how you wish to subset the job type entries, then all jobs which satisfy the selection criteria are displayed.

Job Schedule By Date

This enquiry allows you to examine which jobs are scheduled for a specific date. The enquiry allows you to specify both past and future dates.

The screenshot shows a terminal window titled "Machine Manager" with the system identifier "STUDB30A". The main heading is "Job Schedule Enquiry by Date". Below this, there are two input fields: "Schedule date 270494" and "Job type 3 (1=Start, 2=End, 3=Both)". At the bottom left of the window, it says "F3=Exit".

Fields:

Schedule Date

Enter the date for which you wish to see schedules. The default is today.

Job Type

- 1 - View day start jobs
- 2 - View day end jobs
- 3 - View both day start and day end jobs

When you have made your selection press
Enter.
