Chapter 6

Explorer Action Tracker

What Is Action Tracker?

Action Tracker enables you to view the current status of any Document Type on your database. In most cases these are documents, such as Sales Orders or Picking Notes, but they could also be enquiries. You may also launch a pending Document Type.

To use this facility select the Action Tracker button on the Explorer toolbar.

Warning: The Work Management application must be installed on your host if you want to use the Action Tracker or Action List functions.

Action Tracker Menu Bar

Note: The Action Tracker Menu Bar is displayed with the Action Tracker Menu Window.

The Action Tracker Menu Bar has three drop-down menu options:

- File Menu
- View Menu
- Help Menu.

File Menu

Menu options:

These options are not enabled until you have performed a search. To do this complete the Search Details panel then, if you want to refine the search even further, complete the Advanced. The bottom of the screen expands to display the results of the search in a list view. Select an item in the list and then these menu options will become enabled. Please refer to the Action Tracker Menu Window.

Cancel

Sets the status of a Document Type, which you select in the list view, to Cancel. You can do this only with Active or Pending Document Types. You have to confirm the cancellation and then the Document Type is removed from the list view.

Completion Details

Displays the Activity Completion Details Window for you to view the details for the completion of the Document Type. A Document Type gets processed through an activity and this window displays all the appropriate Document Types for the same activity. You can't complete from here, you can only view the completion details.

Audit

Reduces the selection in the list view to help you to audit a particular type of Document Type. For example if you type in Sales Order then the list view shows only those Document Types which have the words Sales Order contained in the description.

Trace

Displays a full history of Document Types including all previous Document Types involved in creating the current Document Type. For example: if the current Document Type is a pick note then the details for the order which created the pick note are also displayed.

Execute

Launches a selected Document Type, provided that its status is pending.

Note: This would also cause the corresponding item to be removed from the To Do list.

Close

Closes all of the Action Tracker windows.

View Menu

Menu options:

These options work like normal Windows functions.

Large Icons

Display the Document Types with large icons.

Small Icons

Display the Document Types with small icons.

List

Display the Document Types as a list.

Details

Display the Document Types with details.

Arrange Icons

You determine how you want the list to be ordered: by Role, by Business Process, by Activity Description or by Date and Time.

Help Menu

Menu options:

Action Tracker Help

Displays the online help to assist you in working with Action Tracker.

Action Tracker Icons

Action Tracker displays the business objects with Icons alongside. There are many different icons which all represent a different status and type of action. The colour of the icon represents the status, and the design of the icon represents the action.

Statuses

There are four statuses shown by icon colours. The actual design of the icon will vary according to the action type as detailed later in this section.

Pending (Status 1) - Red icons: 

Active (Status 2) - Yellow Icons: 

Completed (Status 3) - Green Icons: 

Cancelled (Status 4) - White icons with a red cross: 

Two statuses are shown by icon designs:

Reassigned (Status 5): 

Unknown: 

Actions

There are six type of actions, shown by six different designs of icon. The actual colour of the icon displayed will depend upon the status of the action, as detailed earlier in this section.

Automatic batch: 

Scheduled batch: 

Automatic Immediate: 

User Controlled - Role:

User Controlled - Email: 

Action Tracker Windows

Note: The Action Tracker Menu Bar is displayed with the Action Tracker Menu Window.

The following windows sections give you detailed information about using the windows for Action Tracker.

Activity Completion Details Window

To display this window select the Completion Details option on the File menu.

Type of Document	Reference	Completion Code	Reason Code	Completion Date	Completion Time
SALESORDER	0002332	Sales order created		16/06/98	10:22:10

This window is for viewing only and displays the details for the completion of the Document Type. A Document Type gets processed through an activity and this window displays all the appropriate Document Types for the same activity.

Fields:

Activity

The activity through which the Document Type gets processed.

Business Process

The Business Process through which the activity gets processed.

Input Document Type

The Document Type which is input to the activity.

Reference

The reference for the Document Type.

Completion Details

A list view of the details relating to those Document Types which have been output from the activity.

Buttons:

Cancel

Close the window.

Action Tracker Menu Window

 To display this window select the Action Tracker button on the Explorer toolbar.

Note: The Action Tracker Menu Bar is displayed with the Action Tracker Menu Window.

Activity Description	Executed By	Doc Type Description
Order entry (conversational)	(GBJBZLN)	Sales Order
Order entry (conversational)	Work Management Engine	Sales Order
Order acknowledged	z1admin@z1...	Sales Order
Order entry (conversational)	(GBJBZLN)	Sales Order
Order entry (conversational)	Work Management Engine	Sales Order
Order acknowledged	z1admin@z1...	Sales Order
Order entry (conversational)	OECLERK (GBJBAPCW)	Sales Order
Suspended order release	(GBJBAPCW)	Sales Order
Suspended order release	SADMIN (GBJBAPCW)	Sales Order

You can view the current status of any Document Type on your database. You enter search criteria, press the Find button and the bottom of the screen expands to display the results of the search.

Tip: Use the Search Details panel first and then go on to use the Advanced panel if you want to refine the search even further.

Fields:

Search Details

Enter the search criteria. This is a way of refining the search to reduce the number of records displayed. Both Business Object and Reference Number fields are optional and the default for Roles is Current. You can ignore all these fields and then all current Document Types are selected for the search.

Type Of Document

Browse the list of document types in the Document Type file supplied with Explorer.

Reference

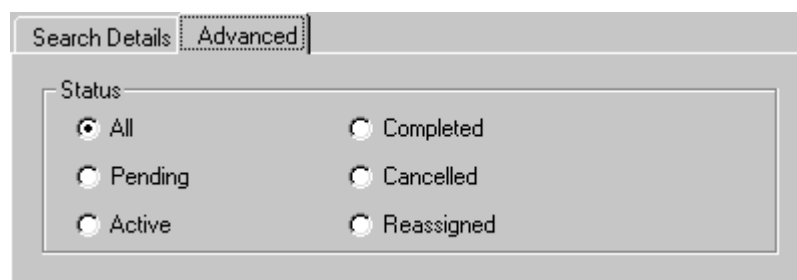

The Reference Number for the Document Type. A list of Reference numbers is supplied with Explorer. You see these in the list view when you do the search.

Roles

You can select Document Types which relate only to particular roles:

- Current (default) - uses the Role Menu currently displayed on the toolbar.
- Selection - displays a Select Roles Window for you to select roles from a list. You select these before you click the Find button.
- All - finds Document Types for all of the roles.

Advanced

The screenshot shows a dialog box with two tabs: 'Search Details' and 'Advanced'. The 'Advanced' tab is selected. Inside the 'Advanced' tab, there is a section titled 'Status' containing six radio button options arranged in two columns: 'All' (selected), 'Completed', 'Pending', 'Cancelled', 'Active', and 'Reassigned'.

Further refine the search by defining the status of the documents.

Tip: If you want to you can ignore this panel altogether and accept the default to select all pending documents.

Status

Select which type of documents you want involved in the search. The default is to select all pending documents. These are the choices:

- All - all documents.
- Pending - those Document Types waiting to be executed. They may also be itemised on a To Do list. They appear in the list view as red icons.
- Active - those Document Types being executed. They appear in the list view as yellow icons.
- Completed - those Document Types which have been executed. See Activity Completion Details Window. They appear in the list view as green icons.
- Cancelled - those Document Types which have been cancelled. See the File menu for the Cancel option. They appear in the list view as white icons with a red cross.

- Reassigned those Document Types which have been reassigned to a different role type or user. They appear in the list with this icon:

- No Status Assigned - There is not an option for this but very rarely you may see items in the list view with an exclamation mark symbol. If you see these please contact your System Administrator.

Buttons:

Find

Starts the search.

Stop

Stops the search whilst in progress.

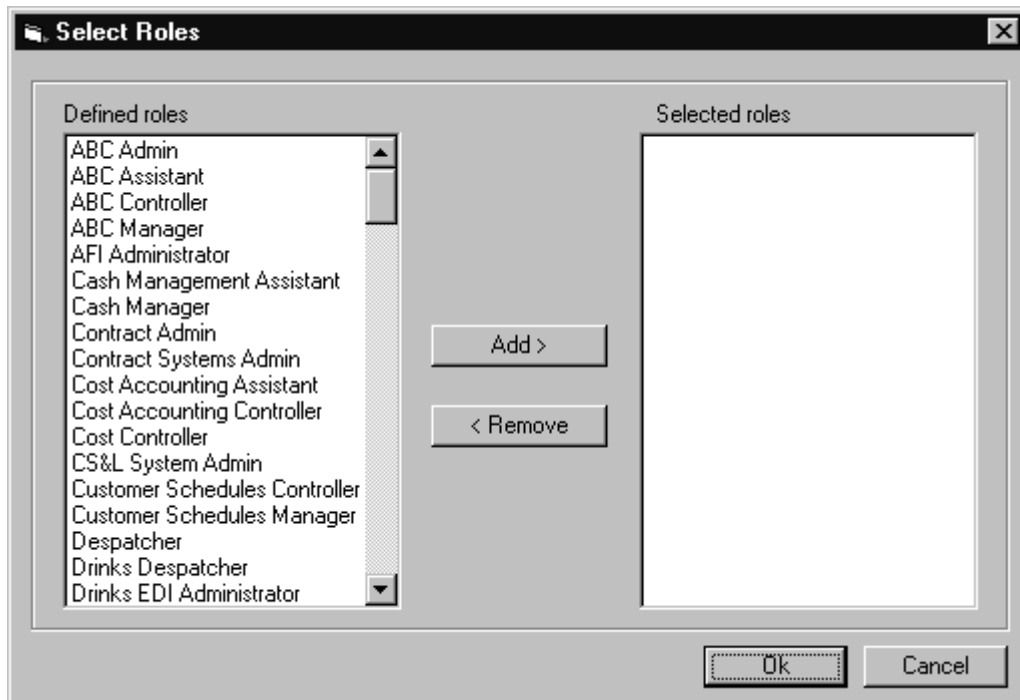

New Search

Resets all details ready for a new search.

Action Tracker Select Roles Window

To display this window select the Selection option button on the Action Tracker Menu Window and then click the Find button.

You can select roles from a list. The roles you select are used to refine the search for the Action Tracker.

Fields:

There are two list views: Defined Roles and Selected Roles. Use the Add/Remove buttons to move roles between the two list views.

The roles in the Defined Roles view are the roles available to you.

The roles in the Selected Roles view are the ones used for the search.

Buttons:

Add

Move roles from the Defined Roles list to the Selected Roles list.

Remove

Move roles from the Selected Roles list to the Defined Roles list.

OK

Save the changes and close the window.

Cancel

Close the window without saving the changes.
