Chapter 1

Overview

Introduction

JBA Workspace Designer is a facility within JBA Client Workspace that allows the customisation of the appearance and behaviour of JBA System 21 applications.

Using Workspace Designer you can:

- Remove fields or field descriptions from the display.
- Change the location of a field or field description in a Screen.
- Change the appearance of a field or field description.
- Create input and output masks for a field.
- Alter the content of a field or field description before it is displayed, or before data is sent to the server.
- Place the contents of a field into a variable.
- Place the contents of a variable into a field.
- Perform actions depending on the value in a field or variable.
- Use custom controls to enhance the display of information.
- Add online help to System 21 Applications.

Note: To enable any changes made using Workspace Designer, you must have the Panel Recognition and Reformatting box checked, from the System / Preferences option in JBA Client Workspace.

For more information see the Client Workspace product guide.

Note: Remember - if you wish to run any queries, using either the Command Line, or the SQL Utility, you need to have the Panel Recognition and Reformatting check box unselected, otherwise important data areas could be ignored.

Prerequisites

The following are prerequisites to running System 21 Client Workspace and Workspace Designer.

Client Workspace

Please note that System 21 Client Workspace supports only the configuration detailed separately on the latest System 21 Configuration Information Sheet issued by JBA International.

Workspace Designer

Workspace Designer can only be run if:

- Microsoft Windows 3.1 or higher is installed on your PC.
- Workspace Designer has been enabled. If you do not know how to do this contact your JBA representative.

Logging On And Logging Off

Workspace Designer is used from within JBA Client Workspace.

To logon to Designer, click the Designer button on the far right of the toolbar in Client Workspace:

To log off from Designer, click the On button in the centre of the Designer toolbar:

For further details refer to the Client Workspace product guide.
